International Sport Richard William Cox, 2004

There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new

Boxing, Narrative and Culture Sarah Crews, P. Solomon Lennox, 2023-10-16

Boxing Narrative and Culture Critical Perspectives is the first interdisciplinary response to the dominant boxing narratives that are produced performed and circulated in commercial boxing culture This collection includes global perspectives on boxing It highlights the diverse range of bodies and communities that engage with boxing practices but are

oftentimes overlooked and overwritten by popular narrative tropes and misconceptions of the sport. These interdisciplinary and global perspectives engage with boxing's shared narrative resources offering new readings and insights on how and what boxing performs and for whom. The contributors to this collection are academics, artists, amateur boxers and/or coaches who provide a culture critique of boxing. The work shows how boxing practices are performed and channelled by individuals and communities who access and utilise boxing culture as a means of physical enquiry, political statement and community building. These contributions challenge the notion that boxing is a sport reserved for masculine bodies adorned as heroes, warriors or victims of the sport. Exploring key themes in socio-cultural studies including gender, race, community, media and performance, this book is fascinating reading for anybody with an interest in physical culture, sport studies, cultural studies, gender studies, cultural geography, critical race theory, labour studies, performance studies or media studies.

Nationalism
Eric Storm, 2024-10-29. A global perspective on the nature and evolution of nationalism from the early modern era to the present. The current rise of nationalism across the globe is a reminder that we are not after all living in a borderless world of virtual connectivity. In *Nationalism*, historian Eric Storm sheds light on contemporary nationalist movements by exploring the global evolution of nationalism beginning with the rise of the nation state in the eighteenth century through the revival of nationalist ideas in the present day. Storm traces the emergence of the unitary nation state which brought citizenship rights to some while excluding a multitude of others and the pervasive spread of nationalist ideas through politics and culture. Storm shows how nationalism influences the arts and humanities, mapping its dissemination through newspapers, television and social media. Sports and tourism too have helped fashion a world of discrete nations, each with its own character, heroes and highlights. Nationalism saturates the physical environment not only in the form of national museums and patriotic statues but also in efforts to preserve cultural heritage, create national parks, invent ethnic dishes and beverages, promote traditional building practices and cultivate native plants. Nationalism has even been used for selling cars, furniture and fashion. By tracing these tendencies across countries, Storm shows that nationalism's watershed moments were global. He argues that the rise of new nation states was largely determined by shifts in the international context, that the relationships between nation states and their citizens largely developed according to global patterns and that worldwide intellectual trends influenced the nationalization of both culture and environment. Over the centuries, nationalism has transformed both geopolitics and the everyday life of ordinary people.
