Slam Ii A. Alan B. Pritsker, Charles Elliott Sigal, R. D. Jack Hammesfahr, 1994 *Simulation with Visual SLAM and AweSim* A. Alan B. Pritsker, Jean J. O'Reilly, 1999-03-19 This book presents a process for problem resolution policy crafting and decision making based on the use of modeling and simulation Detailed descriptions of the methods by which Visual SLAM and AweSim version 3 support this process are presented The text is organized into four parts Introduction to Simulation Visual SLAM Network Modeling and AweSim Simulation Analysis and Visual SLAM Discrete Continuous and Combined Modeling *Handbook of Simulation* Jerry Banks, 1998-09-14 The only complete guide to all aspects and uses of simulation from the international leaders in the field There has never been a single definitive source of key information on all facets of discrete event simulation and its applications to major industries The Handbook of Simulation brings together the contributions of leading academics practitioners and software developers to offer authoritative coverage of the principles techniques and uses of discrete event simulation Comprehensive in scope and thorough in approach the Handbook is the one reference on discrete event simulation that every industrial engineer management scientist computer scientist operations manager or operations researcher involved in problem solving should own with an in depth examination of Simulation methodology from experimental design to data analysis and more Recent advances such as object oriented simulation on line simulation and parallel and distributed simulation Applications across a full range of manufacturing and service industries Guidelines for successful simulations and sound simulation project management Simulation software and simulation industry vendors *Flowgraph Models for Multistate Time-to-Event Data* Aparna V. Huzurbazar, 2004-12-03 A unique introduction to the innovative methodology of statistical flowgraphs This book offers a practical application based approach to flowgraph models for time to event data It clearly shows how this innovative new methodology can be used to analyze data from semi Markov processes without prior knowledge of stochastic processes opening the door to interesting applications in survival analysis and reliability as well as stochastic processes Unlike other books on multistate time to event data this work emphasizes reliability and not just biostatistics illustrating each method with medical and engineering examples It demonstrates how flowgraphs bring together applied probability techniques and combine them with data analysis and statistical methods to answer questions of practical interest Bayesian methods of data analysis are emphasized Coverage includes Clear instructions on how to model multistate time to event data using flowgraph models An emphasis on computation real data and Bayesian methods for problem solving Real world examples for analyzing data from stochastic processes The use of flowgraph models to analyze complex stochastic networks Exercise sets to reinforce the practical approach of this volume Flowgraph Models for Multistate Time to Event Data is an invaluable resource reference for researchers in biostatistics survival analysis systems engineering and in fields that use stochastic processes including anthropology biology psychology computer science and engineering **Planning, Design, and Analysis of Cellular**

Manufacturing Systems A.K. Kamrani,H.R. Parsaei,D.H. Liles,1995-04-11 Leading researchers in the field of cellular manufacturing systems from academia and industry have contributed to this volume The book aims to report the latest developments and address the central issues in the design and implementation of cellular manufacturing systems Cellular Manufacturing CM is one of the major concepts used in the design of flexible manufacturing systems CM also known as group production or family programming can be described as a manufacturing technique that produces families of parts within a single line or cell of machines The first part of the book describes various techniques for design and modeling of cellular manufacturing systems The second part is concerned with performance measure and analysis followed by a section which presents the applications of artificial intelligence and computer tools in cellular manufacturing systems The Army Communicator ,1988

Marine Navigation and Safety of Sea Transportation Adam Weintrit,2013-06-04 The TransNav 2013 Symposium held at the Gdynia Maritime University Poland in June 2013 has brought together a wide range of participants from all over the world The program has offered a variety of contributions allowing to look at many aspects of the navigational safety from various different points of view Topics presented and discussed at the Symposium were navigation safety at sea sea transportation education of navigators and simulator based training sea traffic engineering ship s manoeuvrability integrated systems electronic charts systems satellite radio navigation and anti collision systems and many others This book is part of a series of four volumes and provides an overview of advances in Marine Navigation and is addressed to scientists and professionals involved in research and development of navigation safety of navigation and sea transportation

Project Management in Manufacturing and High Technology Operations Adedeji Bodunde Badiru,1996-06-07 Project management is a system originally developed within the construction industry for controlling schedules costs and specifications of large multitask projects In recent years manufacturers have discovered that project management s time tested techniques dovetail neatly with the current thinking on quality control and management in a highly competitive global marketplace The system has been increasingly recognized for its suitability in the manufacturing process and is now applied in virtually every area of production One of the foremost proponents of this trend is Adedeji Badiru an internationally recognized authority on project management whose books have helped thousands of companies adapt the system to their particular needs This completely revised Second Edition of Badiru s breakthrough publication Project Management in Manufacturing and High Technology Operations focuses on the dramatic increase in the use of high tech machinery in industrial operations and seamlessly integrates high tech themes into a general discussion of project management An introductory chapter on manufacturing analysis investigates how the latest concepts and techniques of project management are applied to manufacturing The main body of the book offers a wealth of new material including discussions of learning curve analysis basic models for forecasting and inventory control economic analysis of manufacturing techniques for data analysis and the application of expert systems The chapter on computer applications in project

management is completely revised and updated to reflect the enormous strides taken in this area in recent years This book presents an up to date practical approach to project management in manufacturing Written by a pioneer in the application of project management to the manufacturing industries this revised and expanded Second Edition of Project Management in Manufacturing and High Technology Operations reflects the increased use of high tech machinery in industrial operations and the trends of recent years to apply project management methods to every phase of production Complete with numerous illustrations as well as exercises to wrap up each chapter this Second Edition features An emphasis on practical examples including many new case studies and a full chapter on the lessons learned from the space shuttle Challenger disaster Many new project management concepts and techniques that focus on manufacturing but can be applied to any project A new chapter on manufacturing systems analysis that provides the backdrop for the project analysis that takes place throughout the book Expanded discussions of the latest quantitative and managerial approaches including learning curve analysis basic models for forecasting and inventory control economic analysis of manufacturing techniques for data analysis and the application of expert systems A strong international perspective useful for multinational companies and for academic purposes This book equips engineers and managers with the tools to effectively manage all aspects of a project including quality control schedules and expenses Used as a text in engineering or business courses it offers absorbing supplemental reading for students at the upper undergraduate and graduate levels Professor Badiru has been widely praised for his incisive and highly relevant case studies In this Second Edition the case study approach is expanded so that chapters typically include two real world examples of the project management techniques or issues in question In the final chapter Badiru takes a close and painful look at a high tech disaster the explosion of the space shuttle Challenger He offers rare and instructive insight into the devastating failure of a high tech project still poignant despite the passage of time Communicative throughout this volume provides a solid up to date reference for engineers and managers in manufacturing as well as for consultants and administrators in related fields Professor Badiru s proven reputation for providing interesting lecture material also makes Project Management in Manufacturing and High Technology Operations especially useful as a technology management text in both engineering and business schools Cover Design Illustration David Levy

Computer Systems Performance Evaluation and Prediction Paul J. Fortier, Howard Michel, 2003-06-25 Table of contents **Big Data Analytics Using Multiple Criteria Decision-Making Models** Ramakrishnan Ramanathan, Muthu Mathirajan, A. Ravi Ravindran, 2017-07-12 Multiple Criteria Decision Making MCDM is a subfield of Operations Research dealing with decision making problems A decision making problem is characterized by the need to choose one or a few among a number of alternatives The field of MCDM assumes special importance in this era of Big Data and Business

Analytics In this volume the focus will be on modelling based tools for Business Analytics BA with exclusive focus on the sub field of MCDM within the domain of operations research The book will include an Introduction to Big Data and Business Analytics and challenges and opportunities for developing MCDM models in the era of Big Data **Introduction to Intelligent Simulation: The RAO Language** Abdelhakim Artiba,V.V. Emelyanov,S.I. Iassinovski,2012-12-06 Introduction to Intelligent Simulation of Complex Discrete Systems and Processes RAO Language focuses on a unique approach in modeling and simulation of complex systems In this volume are considered features of complex systems and processes their mathematical description and modeling Theoretical foundations of the RAO Resource Action Operation language as well as its syntax and utilisation are given Examples of simulation models of different complexity levels related to different fields are also presented The RAO intelligent modeling system introduced and described in Introduction to Intelligent Simulation of Complex Discrete Systems and Processes is unique because 1 it makes simulation modeling universal for the classes of systems and processes modeled 2 it is simple to modify the models and 3 it has the capacity to model complex control systems together with the object controlled including simulation modeling for on line control The RAO tool allows the user to use a language very similar to his professional language and rids him of intermediary supplementary description of the system modeled In fifteen chapters this volume provides an overview of general modeling trends and hence serves the research community in guiding their modeling methods intelligent simulation modeling is introduced to solve complex systems and processes *Transactions of the Society for Computer Simulation* ,2001
