Dissecting Death Frederick Zugibe, M.D., David L. Carroll, 2006-07-18 From TV s CSI to bestsellers by Patricia Cornwell and Kathy Reichs interest in forensics is at an all time high Now one of our most respected forensic pathologists gives a behind the scenes look at eleven of his most notorious cases cracked by scientific analysis and Sherlock Holmesian deduction As chief medical examiner of Rockland County New York for almost thirty five years Dr Frederick Zugibe literally wrote the book on the subject his widely used textbook is considered the definitive text Over the years he has pioneered countless innovations including the invention of a formula to soften mummified fingers enabling

fingerprinting and thus identification of a long deceased victim He has appeared as an expert hundreds of times in the media and in the courtroom and not once has a jury failed to accept his testimony over opposing expert witnesses And now in Dissecting Death he has opened the door to the world of forensic pathology in all its gruesome and fascinating mystery Dr Zugibe takes us through the process all good pathologists follow using eleven of his most challenging cases With him we visit the often grisly though sometimes shockingly banal crime scene We inspect the body palpate the wounds search for clues in the hair and skin We employ ultraviolet light strange measuring devices optical instruments We see how a forensic pathologist determines the hour of death the type of weapon used the killer s escape route And then we enter the lab the world of high tech criminal detection DNA testing fingerprinting gunshot patterns dental patterns X rays But not every case ends in a conviction and in a closing chapter Dr Zugibe examines some recent high profile cases in which blunders led to killers going free either because the wrong party was brought to trial or because the evidence presented didn t do the trick including Jon Benet Ramsey s murder and of course the O J Simpson trial
