NEVIL SHUTE.** Nevil Shute,1956 Slide Rule Nevil Shute (Flugzeugkonstrukteur, Schriftsteller, England, Australien),1954 **An Engineer's Alphabet** Henry Petroski,2011-10-10 Written by America s most famous engineering storyteller and educator this abecedarium is one engineer s selection of thoughts quotations anecdotes facts trivia and arcana relating to the practice history culture and traditions of his profession The entries reflect decades of reading writing talking and thinking about engineers and engineering and range from brief essays to lists of great engineering achievements This work is organized alphabetically and more like a dictionary than an encyclopedia It is not intended to be read from first page to last but rather to be dipped into here and there as the mood strikes the reader In time it is hoped this book should become the source to which readers go first when they encounter a vague or obscure reference to the softer side of engineering *Umberto Nobile And the Arctic Search for the Airship Italia* Garth Cameron,2017-09-09 By the time it was over eight of the crew and nine rescuers were dead and scores more had been put in harm s way The disappearance and search for the airship Italia was headline news all over the world for months after its last radio message on 25 May 1928 It had reported being to the north east of its base at Kings Bay on the Arctic island of Spitsbergen returning from a long flight to Greenland and the North Pole Ships aircraft and men from many countries converged on Kings Bay to participate in the rescue effort The Italian airship designer and pilot Umberto Nobile had flown to the North Pole and beyond in 1926 He resolved to return to the Arctic with a new airship in 1928 The expedition had geographical and scientific aims but the political environment was also an important motivator Benito Mussolini and his fascist party had come to power in 1922 and a successful expedition to the Arctic would be excellent propaganda Engineers Matthew Wells,2010-03-04 Describes and illustrates engineering design and what conditions events cultural influences and personalities have brought it to its present state For professional and student architects and engineers *Delphi Complete Works of Nevil Shute (Illustrated)* Nevil Shute,2020-06-11 Nevil Shute was an English novelist and aeronautical engineer who spent his later years living in Australia His novels are written in a simple highly readable style with clearly delineated plots An enduring theme of his novels is the dignity of work spanning all classes His famous novel *On the Beach* 1957 reflects his pessimism for humanity in the atomic age while *A Town like Alice* 1950 tackles themes of emigration and racism as the heroine seeks economic prosperity in a disadvantaged outback community Several of Shute s novels explore the boundary between accepted science

and rational belief on the one hand and mystical or paranormal possibilities on the other The author is noted for his unique talent of weaving his technical knowledge of engineering into the texture of his narratives For the first time in publishing history this eBook presents Shute s complete works with numerous illustrations rare texts informative introductions and the usual Delphi bonus material Version 1 Beautifully illustrated with images relating to Shute s life and works Concise introductions to the novels and other texts All 23 novels with individual contents tables Images of how the books were first published giving your eReader a taste of the original texts Excellent formatting of the texts The rare play script Vinland the Good Features Shute s autobiography discover his intriguing life Ordering of texts into chronological order and genres Please note The Seafarers was published many years after Shute s death and so cannot appear in this collection due to copyright restrictions CONTENTS The Novels Marazan 1926 So Disdained 1928 Lonely Road 1932 Ruined City 1938 What Happened to the Corbetts 1938 An Old Captivity 1940 Landfall 1940 Pied Piper 1942 Pastoral 1944 Most Secret 1945 The Chequer Board 1947 No Highway 1948 A Town like Alice 1950 Round the Bend 1951 The Far Country 1952 In the Wet 1953 Requiem for a Wren 1955 Beyond the Black Stump 1956 On the Beach 1957 The Rainbow and the Rose 1958 Trustee from the Toolroom 1960 Stephen Morris 1961 Pilotage 1961 The Film Script Vinland the Good 1946 The Autobiography Slide Rule Autobiography of an Engineer 1954 Please visit [www.delphiclassics.com](http://www.delphiclassics.com) to browse through our range of exciting titles or to purchase this eBook as a Parts Edition of individual eBooks

**Britain's War Machine** David Edgerton,2011-09-09 The familiar image of the British in the Second World War is that of the plucky underdog taking on German might David Edgerton s bold compelling new history shows the conflict in a new light with Britain as a very wealthy country formidable in arms ruthless in pursuit of its interests and in command of a global production system Rather than belittled by a Nazi behemoth Britain arguably had the world s most advanced mechanized forces It had not only a great empire but allies large and small Edgerton shows that Britain fought on many fronts and its many home fronts kept it exceptionally well supplied with weapons food and oil allowing it to mobilize to an extraordinary extent It created and deployed a vast empire of machines from the humble tramp steamer to the battleship from the rifle to the tank made in colossal factories the world over Scientists and engineers invented new weapons encouraged by a government and prime minister enthusiastic about the latest technologies The British indeed Churchillian vision of war and modernity was challenged by repeated defeat at the hands of less well equipped enemies Yet the end result was a vindication of this vision Like the United States a powerful Britain won a cheap victory while others paid a great price Putting resources machines and experts at the heart of a global rather than merely imperial story Britain s War Machine demolishes timeworn myths about wartime Britain and gives us a groundbreaking and often unsettling picture of a great power in action

Nuclear Fear Spencer R. WEART, Spencer R Weart, 2009-06-30 Our thinking is inhabited by images images of sometimes curious and overwhelming power The mushroom cloud weird rays that can transform the flesh the twilight world following a nuclear war the white city of the future the brilliant but mad scientist who plots to destroy the world all these images and more relate to nuclear energy but that is not their only common bond Decades before the first atom bomb exploded a web of symbols with surprising linkages was fully formed in the public mind The strange kinship of these symbols can be traced back not only to medieval symbolism but still deeper into experiences common to all of us This is a disturbing book it shows that much of what we believe about nuclear energy is not based on facts but on a complex tangle of imagery suffused with emotions and rooted in the distant past *Nuclear Fear* is the first work to explore all the symbolism attached to nuclear bombs and to civilian nuclear energy as well employing the powerful tools of history as well as findings from psychology sociology and even anthropology The story runs from the turn of the century to the present day following the scientists and journalists the filmmakers and novelists the officials and politicians of many nations who shaped the way people think about nuclear devices The author a historian who also holds a Ph D in physics has been able to separate genuine scientific knowledge about nuclear energy and radiation from the luxuriant mythology that obscures them In revealing the history of nuclear imagery Weart conveys the hopeful message that once we understand how this imagery has secretly influenced history and our own thinking we can move on to a clearer view of the choices that confront our civilization

 Nuclear Fear is a rich layered journey back through our atomic history to the primal memories of monstrous mutants and  
 mad scientists It is a deeply serious book but written in an accessible style that reveals the culture in which this fear emerges  
 only to be suppressed and emerge again Ellen Goodman Boston Globe Reviews of this book A historical portrait of the  
 quintessential modern nightmare Weart shows in meticulous and fascinating detail how the ancient images of alchemy fire  
 sexuality Armageddon gold eternity and all the rest immediately clustered around the new science of atomic physics There is  
 no question that the image of nuclear power reflects a complex and deeply disturbing portrait of what it means to be human  
 Stephan Salisbury Philadelphia Inquirer Reviews of this book A detailed probing study of American hopes dreams and  
 insecurities in the twentieth century Weart has a poet s acumen for sensing human feelings Nuclear Fear remains captivating  
 as history and original as an anthropological study of how nuclear power like alchemy in medieval times offers a convenient  
 symbol for deeply rooted human feelings Los Angeles Times Reviews of this book Weart s tale boldly sweeps from the  
 futuristic White City of the 1893 Chicago World s Fair and the discovery of radioactivity in 1896 through Hiroshima and Star  
 Wars An admirable call for synthesis of art and science in a true transmutation that takes us beyond nuclear fear H Bruce
