Building Models for Marketing Decisions Peter S.H. Leeflang,Dick R. Wittink,Michel Wedel,Philippe A. Naert,2013-06-29 This book is about marketing models and the process of model building Our primary focus is on models that can be used by managers to support marketing decisions It has long been known that simple models usually outperform judgments in predicting outcomes in a wide variety of contexts For example models of judgments tend to provide better forecasts of the outcomes than the judgments themselves because the model eliminates the noise in judgments And since judgments never fully reflect the complexities of the many forces that influence outcomes it is easy to see why models of actual outcomes should be very attractive to marketing decision makers Thus appropriately constructed models can provide insights about structural relations between marketing variables Since models explicate the relations both the process of model building and the model that ultimately results can improve the quality of marketing decisions Managers often use rules of thumb for decisions For example a brand manager will have defined a specific set of alternative brands as the competitive set within a product category Usually this set is based on perceived similarities in brand characteristics advertising messages etc If a new marketing initiative occurs for one of the other brands the brand manager will have a strong inclination to react The reaction is partly based on the manager s desire to maintain some competitive parity in the marketing variables

Introduction to Critical Care Nursing Mary Lou Sole,Deborah G. Klein,Marthe J. Moseley,2009 Here s the essential information you need to know in critical care nursing all in one concise text Using a to the point reader friendly approach Introduction to Critical Care Nursing 5th Edition provides authoritative real world information on the important concepts of critical care nursing and the assessment and technical skills associated with the management of critically ill patients The latest content on the technology makes it easy to learn and understand how to use the equipment you ll use in the field

Nursing care chapters are organized according to the nursing process framework and you'll find detailed nursing care plans in every management chapter. Case studies and critical thinking questions challenge you to apply what you've learned and user-friendly features throughout the text. Updated pharmacology tables, clinical and laboratory alerts, and evidence-based practice boxes help you bridge the gap between concepts and clinical practice. Nursing Care Plans provide nursing diagnoses, expected patient outcomes, and interventions with rationales to prepare you for clinical practice. Case Studies challenge you to apply concepts from the book to real-life patient situations to test their critical thinking skills. Streamlined and updated Pharmacology Tables detail the actions, indications, dosages, and routes and side effects of commonly used critical care drugs. Clinical Alerts promote optimal patient safety and outcomes by highlighting potential problems and concerns in the clinical setting. Laboratory Alerts discuss both common and cutting-edge tests and procedures, emphasizing the importance of laboratory test results to critical nursing care. Critical Thinking Questions in every chapter encourage you to use and reinforce the concepts presented throughout the chapter. Now full color throughout, new vibrant artwork and anatomical images are in true-to-life color. A new chapter on end-of-life care covers ethical and legal matters, palliative care, withholding of therapies, and communication issues—all essential concerns confronting today's critical care nurse. New features on evidence-based practice, genetics, transplantation, and geriatric considerations offer realistic, easy-to-understand information on some of the most important and rapidly changing topics in critical care today.
