*Small-aperture Radio Direction-finding* Herndon H. Jenkins, 1991 Operating principles Performance definition Direction finding error sources System level descriptions Representative operational small aperture Passive geolocation Subsystem considerations Calibration and test of direction finding systems *Radio Direction Finding and Superresolution* P. J. D. Gething, 1991 Enlarged and revised second edition Modern direction finders capable of measuring elevation angles as well as azimuth angles on the components of multi ray wavefields have become powerful tools for research in ionospheric physics and HF radio propagation The complexity of the problem of resolving closely spaced rays requires the combined use of wide aperture antenna arrays multichannel receiving systems and sophisticated digital processing techniques *An Investigation of a Digital Bearing Computer for a Small Aperture Radio Direction Finding System* Hubert Lee Grush, 1965 *Modern HF Signal Detection and Direction Finding* Jay R. Sklar, 2018-09-25 Detailed descriptions of detection direction finding and signal estimation methods using consistent formalisms and notation emphasizing HF antenna array sensing applications Adaptive antenna array technology encompasses many powerful interference suppression approaches that exploit spatial differences among signals reaching a radio receiver system Today worldwide propagation phenomenology occurring in the High Frequency HF radio regime has made such interference common In this book Jay Sklar a longtime researcher at MIT Lincoln Laboratory presents detailed descriptions of detection direction finding and signal estimation methods applicable at HF using consistent formalisms and notation Modern electronic system technology has made many of these techniques affordable and practical the goal of the book is to offer practicing engineers a comprehensive and self contained reference that will encourage more widespread application of these approaches The book is based on the author s thirty years of managing MIT Lincoln Laboratory work on the application of adaptive antenna array technologies to the sensing of HF communication signals After an overview of HF propagation phenomenology communication signal formats and HF receiver architectural approaches Sklar describes the HF propagation environment in more detail introduces important modulation approaches and signaling protocols used at HF discusses HF receiver system architectural features and addresses signal processor architecture and its implementation He then presents the technical foundation for the book the vector model for a signal received at an adaptive array antenna He follows this with discussions of actual signal processing techniques for detection and direction finding including specific direction finding algorithms geolocation techniques and signal estimation *Illinois Technograph* , 1959 *Electronic Warfare Receivers and Receiving Systems* Richard A. Poisel, 2015-06-01 Receivers systems are considered the core of electronic warfare EW intercept systems Without them the fundamental purpose of such systems is null and void This book considers the major elements that make up receiver systems and the receivers that go in them This resource provides system design engineers with techniques for design and development of EW receivers for modern modulations spread spectrum in addition to receivers for older common modulation formats Each major module in these

receivers is considered in detail Design information is included as well as performance tradeoffs of various components Major factors that influence the functioning of the modules are identified and discussed Key performance parameters are identified as well and approaches to achieving design goals are considered
