Smoke In Their Eyes Lessons In Movement Leadership From The Tobacco Wars:

Smoke in Their Eyes Michael Pertschuk, 2001 The classic American struggle between the public interest and corporate interests is perhaps nowhere better illustrated than in the decades long struggle between the tobacco industry and advocates for public health The failure of the global settlement legislation is now viewed by many public health experts as an historic missed opportunity and in this extraordinary book *Smoke in Their Eyes* Michael Pertschuk brilliantly describes the forces brought to bear A lifelong public health leader and tobacco control advocate Pertschuk provides uncommon insight into the movement and its opposition Questions that reveal themselves here can be applied to public advocacy as a whole how can movement leaders gauge and best employ popular support Who has legitimacy to speak on behalf of a particular public cause And perhaps most crucially how is it possible for those whose cause is a moral one to strike political compromise With a narrative as compelling as the issues it raises *Smoke in Their Eyes* will be of great interest to everyone from students of public advocacy and political science to general readers

Tobacco Industry and Smoking Fred C Pampel, Fred C. Pampel, 2009 Praise for the previous edition [The Moralization of the Markets](#) Christoph Henning, 2017-07-12 Nothing affects the modern economy and society more than decisions made in the market place especially but not only decisions made by consumers Although it is not startling to suggest that decisions made in production are affected by choices consumers make consumers have long been viewed not only by academic economists as individual isolated rational actors that make or refrain from purchases purely on the basis of narrow financial considerations Markets are not and never were morally neutral Market relations have always had an often taken for granted moral underpinning The moralization of the markets refers to the dissolution and replacement of the conventional moral underpinnings of market conduct for example in the music market financial markets and corporate governance It further implies not only the heightened importance of new ethical precepts but the significant change in the role of moral ideals in market behavior These profound transformations of economic conduct are accompanied and co determined by societal conflicts The moralization of markets represents thus a new stage in the social evolution of markets The book is divided into four parts in which the twelve chapters written by contributors from different social science disciplines deal with the context of the moralization of the markets the major social institutions and present case studies that examine European and American attitudes and behavior towards tobacco and GMO expansion of the private and ethics in business and how workers respond to the new corporate norms This volume will be of interest to sociologists economists social scientists and the general consumer alike [Law's Allure](#) Gordon Silverstein, 2009-02-09 *Law's Allure* explains how when and why America's reliance on legal rules and judicial decisions shapes constrains saves and sometimes even kills politics [The Expert Consumer](#) Alain Chatriot, Marie-Emmanuelle Chessel, 2017-09-29 Recent work has focused on the politics of consumption and its manifestation in a number of situations This volume extends these debates providing a tighter focus and contributing to a noticeable gap in the field that numerous

scholars are beginning to turn towards that is organizations of consumers themselves who have chosen to speak for all consumers and similar such bodies of experts which act on behalf of consumers The volume is fortunate in drawing upon a number of scholars who are about to publish major works on the subject but who are happy to provide summary versions of their work for the volume The book pays particular attention to specific moments in consumer mobilization and expertise capturing the range of types of expert consumers across the twentieth century from ethical consumer groups at the beginning to intellectuals housewives economists and public officials It addresses questions on the nature of consumer organizing which bodies can speak for consumers whether one consumer voice can ever be identified and the relationship between consumption and citizenship Overview pieces demonstrate the larger narratives involved in the study of the expert consumer whilst more comparative essays set out the nature of transatlantic exchanges Other contributions point to the similarities across seemingly different consumption regimes while case studies of specific organisations and key historical moments draw out the particularities of consumer expertise

ASSIST, 2005 Just as the American Stop Smoking Intervention Study for Cancer Prevention ASSIST was a major shift in the National Cancer Institute's NCI's tobacco prevention and control research and dissemination efforts this monograph is a significant departure from NCI's previous tobacco control monographs For many the ASSIST project represented a logical progression of NCI's phased research approach to reducing tobacco use For others it represented a controversial and overly ambitious leap in a new direction Similarly this monograph departs from the traditional quantitative evidence review format to emphasize instead the practical hands on experience of program implementation Traditional research investigators who defend the sanctity of the randomized clinical trial many of whom were uncomfortable with ASSIST at its outset will also be uncomfortable with the personal and anecdotal flavor of this monograph Public health practitioners on the other hand as well as those investigators who have immersed themselves in the untidy world of implementation research will appreciate the detailed historical accounts of the complexities politics and outright opposition encountered by the ASSIST team The collective experiences described in this monograph provide a rich understanding of the gritty struggle against the powerful forces of the tobacco industry and its allies For students in public health training programs this work also provides a unique view of the world outside of academia where commercial political and public health interests collide in a struggle to define the policies norms and practices that will affect the health of generations page viii

Ending the Tobacco Problem Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Reducing Tobacco Use: Strategies, Barriers, and Consequences, 2007-10-27 The nation has made tremendous progress in reducing tobacco use during the past 40 years Despite extensive knowledge about successful interventions however approximately one quarter of American adults still smoke Tobacco related illnesses and death place a huge burden on our society Ending the Tobacco Problem generates a blueprint for the nation in the struggle to reduce tobacco use The report reviews effective prevention and treatment

interventions and considers a set of new tobacco control policies for adoption by federal and state governments Carefully constructed with two distinct parts the book first provides background information on the history and nature of tobacco use developing the context for the policy blueprint proposed in the second half of the report The report documents the extraordinary growth of tobacco use during the first half of the 20th century as well as its subsequent reversal in the mid 1960s in the wake of findings from the Surgeon General It also reviews the addictive properties of nicotine delving into the factors that make it so difficult for people to quit and examines recent trends in tobacco use In addition an overview of the development of governmental and nongovernmental tobacco control efforts is provided After reviewing the ethical grounding of tobacco control the second half of the book sets forth to present a blueprint for ending the tobacco problem The book offers broad reaching recommendations targeting federal state local nonprofit and for profit entities This book also identifies the benefits to society when fully implementing effective tobacco control interventions and policies

The DeMarco Factor
Michael Pertschuk, 2025-05-20 Vinny DeMarco might be a latter day Don Quixote except that he tilts his lance at real obstacles to social justice lobby locked state legislatures and Congress stonewalling the public will And he makes impossible dreams come true In twenty years of organizing campaigns in Maryland he has led successful efforts to pass gun control laws against National Rifle Association opposition to hike cigarette taxes to prevent youth smoking and to extend health care to hundreds of thousands of low income workers He has also built a unique alliance of mainstream and conservative faith groups which helped secure rare bipartisan votes in Congress for the enactment in July 2009 of landmark FDA regulation of tobacco manufacture and marketing DeMarco s unique strategic template developed over two decades of serial campaigning includes momentum building stages over a multiyear campaign unrelenting skillful access to the media for engaging public support coalitions of hundreds even thousands of faith community labor public health and business groups and a hard press on candidates to support legislation before elections rather than after they are comfortably in office As an organizer leader Demarco also succeeds in his campaigns through force of personality his unquenchable exuberance and idiosyncrasies delight and madden his opponents sometimes his allies too Michael Pertschuk himself a veteran advocate here chronicles three of DeMarco s campaigns each facing a different obstacle course His deep analysis draws out strategic and leadership lessons that engaged citizens and advocates for popular causes stonewalled by powerful lobbies can put to immediate and practical use

[The Foundation](#) Joel L. Fleishman, 2007-01-09 Foundations are a peculiarly American institution They have been the dynamo of social change since their invention at the beginning of the last century Yet they are cloaked in secrecy their decision making and operations are inscrutable to the point of obscurity leaving them substantially unaccountable to anyone Joel Fleishman has been in and around foundations for almost half a century running them, sitting on their boards and seeking grants from them And in this groundbreaking book he explains the history of foundations, tells the stories of the most

successful foundation initiatives and of those that have failed and explains why it matters The baby boomer generation is going to participate in the largest transfer of wealth in history when it passes on its assets to its successor generation The third sector is about to become more powerful than ever This book shows how foundations can provide a vital spur to the engine of the American and the world's economy if they are properly established and run E-Cigarettes and the Comparative Politics of Harm Reduction Virginia Berridge, Ronald Bayer, Amy L. Fairchild, Wayne Hall, 2023-05-30 This open access book offers the first in depth study of the history and current debates surrounding electronic cigarettes comparing the UK US and Australia Since their introduction e cigarettes have been the subject of much public media and regulatory attention with discussion centring on whether these devices encourage or discourage smoking This study delves into the history of policymaking and institutions in three countries which have taken different approaches to the regulation of e cigarettes In the UK the tradition of harm reduction through nicotine has helped form a response which has endorsed e cigarettes though not without considerable controversy In contrast the US has a cessation only anti tobacco agenda and Australia has effectively banned e cigarettes This book argues that each country frames the long term use of nicotine differently and prioritises the health of different groups within the population of smokers or non smokers set against a broad backdrop of national responses to addiction By taking this comparative approach the authors explore the relationship between history evidence and policy in public health more widely **Health Behavior Change in Populations** Scott Kahan, Andrea Carlson Gielen, Peter J. Marshall, 2016-07-25 Public Opinion Public Policy and Smoking tracks Americans changing attitudes about cigarette smoking over the last century With data from more than five thousand public and privately conducted polls this book carefully examines how Americans came to understand the health risks of smoking how the tobacco industry sought to reframe smoking and how public opinion support for tobacco control affected lawsuits elections and public policies This book tests several well known linkage models that connect public opinion with public policy It shows that conventional wisdom about public opinion and tobacco control policy is often mistaken This book offers the first in depth look at American public opinion and cigarette smoking during the last century
