Handbook of nutrition and diet in therapy of bone diseases Ronald Ross Watson, Daruka Mahadevan, 2023-08-07 Many diseases nutrients and foods affect bone structure and bone function and are critical for human health and happiness Osteoporosis is the most common bone metabolic disorder in humans Its incidence is related to poor nutrition altered hormonal status ageing diminished physical activity impaired health status and harmful pharmacotherapy Vitamins especially vitamin D and calcium are historically recognized as important for bone health whereas this book also shows that there is evidence for an association between vitamin D calcium bone mineral density and colorectal cancer In addition calcium supplements may increase the risk for cardiovascular events In regular food patterns milk vegetables herbs fruit and omega 3 may be profitable for bone health Eating disorders also influence bone For example obesity is known to promote bone disease This book discusses the multiple mechanisms by which obesity may affect bone mass and the effect of diet induced maternal obesity on fetal bone development as well as the different nutritional factors that can affect adolescent bone health In addition anorexia nervosa treatments that may help prevent loss of bone mass are reviewed These treatments should not only be geared towards females but also towards males

Segmentation of Hand Bone for Bone Age Assessment Yan Chai Hum, 2013-05-25 The objective of this Brief is to provide a solution to the unsolved technical problem in segmentation for the automated bone age assessment system The task is accomplished by first applying the modified histogram equalized module then applying the proposed automated anisotropic diffusion technique It is followed by a novel fuzzy quadruple division scheme to optimize the central segmentation algorithm and then an additional quality assurance scheme The designed segmentation framework works without demanding scarce resources such as training sets and skillful operators The results have shown that the designed framework is capable of separating the soft tissue and background from the hand bone with high accuracy This Brief should be especially useful for students and professional researchers in the Biomedical and image
