Animal Satire Robert McKay, Susan McHugh, 2023-08-22. Animal Satire presents a cultural history of animal satire, a critically neglected but persistent presence in the history of cultural production in which animals expose human folly while the strategies of satire expose the folly of human-animal relations. Highlighting the teeming animal presences across the history of satirical expression from Aristophanes to Twitter, with chapters on key works of literature, drama, film, and a plethora of satirical media, Animal Satire reveals the rich rhetorical significance of animality in powering the politics of satire from ancient and medieval through modern and contemporary times. More pressingly, the book makes the case for the significance of satire for understanding the real-world implications of rhetoric about animals in ongoing struggles for justice. By gathering both critical and creative examples from representative media forms, historical periods, and continents, this volume aims to enrich scholarship on the history of satire as well as empower creative practitioners with ideas about its practical applications today.

Playful Materialities Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, Raven Rusch, 2022-08-01. Game culture and material culture have always been closely linked. Analog forms of rule-based play, ludus, would hardly be conceivable without dice, cards, and game boards. In the act of free play, paidia, children as well as adults transform simple objects into multifaceted toys in an almost magical way. Even digital play is suffused with material culture. Games are not only mediated by technical interfaces which we access via hardware and tangible peripherals. They are also subject to material hybridization, paratextual framing, and processes of de- and re-materialization.

THE HISTORY of the AFRO-AMERICANS Ivory Simion, 2014-01-25. The author is a simple traveler in time like the rest of us that has a message to give to all who can understand. Who the author is and what universities he attends is not important; only the message that he has delivered is. The content of this book is beyond just passing on knowledge and information to the reader. Within the pages of this book, the reader will obtain, alone, with knowledge and information, understanding and wisdom. The understanding of the message being given and the wisdom to know how and when to apply it to your everyday life. The author is you, me, and the rest of us. All of us who is searching for a message that can help us in our relationships in today's world. What's important is the message that's being given and if it's being received and understood. Then the knowledge can be reviewed to see if it's applicable to apply in our lives in today's society. All understanding and wisdom comes from a higher source than ourselves. The messenger or author is only a conduit.

that is unattached to the source of the understanding and wisdom being given and is there only to pass the message alone
Alone to all who may find the message helpful in their lives and relationships with each other in the world we live in today

Riquet,2019-12-18 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts
conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and
receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in
English literary studies By engaging with the materiality of the literary text its production and reception history and
frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar
frameworks and provide innovative interpretations of both canonical and less well known works The Aesthetics of Island
Space discusses islands as central figures in the modern experience of space It examines the spatial poetics of islands in
literary texts from Shakespeare s The Tempest to Ghosh s The Hungry Tide in the journals of explorers and scientists such as
James Cook and Charles Darwin and in Hollywood cinema It traces the ways in which literary and cinematic islands have
functioned as malleable spatial figures that offer vivid perceptual experiences as well as a geopoetic oscillation between the
material energies of words and images and the energies of the physical world The chapters focus on America s island
gateways Roanoke and Ellis Island visions of tropical islands Tahiti and imagined South Sea islands the islands of the US
Canadian border region in the Pacific Northwest and the imaginative appeal of mutable islands It argues that modern
voyages of discovery posed considerable perceptual and cognitive challenges to the experience of space and that these
challenges were negotiated in complex and contradictory ways via poetic engagement with islands Discussions of island
narratives in postcolonial theory have broadened understanding of how islands have been imagined as geometrical
abstractions bounded spaces easily subjected to the colonial gaze There is however a second story of islands in the Western
imagination which runs parallel to this colonial story In this alternative account the modern experience of islands in the age
of discovery went hand in hand with a disintegration of received models of understanding global space Drawing on and
rethinking post phenomenological geocritical and geopoetic theories The Aesthetics of Island Space argues that the modern
experience of islands as mobile and shifting territories implied a dispersal fragmentation and diversification of spatial
experience and it explores how this disruption is registered and negotiated by both non fictional and fictional responses
