[Playing with Fire \(Wisdom for Women Who Smoke\)](#) Betty Bryenton, 2004 *Playing With Fire* is a unique book that explores current issues surrounding the epidemic of smoking among women This is an extremely important topic today because for the first time in our history young women are more likely than men to become smokers Cancer of the lung is now one of the major causes of cancer deaths among women and women now account for more than half the new cases of lung cancer each year The future looks bleak for it is predicted by the World Health Organization that deaths from lung cancer among women will double over the next twenty years This is in addition to the loss optimum health due to smoking *Playing With Fire* helps to explain the reasons for the current pattern of smoking among women It is the hypothesis of this book that while the lives of women have changed dramatically over the past quarter century the advances that women have made economically and socially have not made our world so much a better place as a more stressful one New roles and responsibilities are layered on top of the older more traditional ones and consequently women are suffering the effects of burnout as never before Cigarette smoking is an effective way of self medicating to alleviate the pain and stress of our daily lives *Playing With Fire* is unique in that it takes a compassionate view of women who smoke and challenges them to explore deeper issues in their lives something vitally important in long term smoking cessation The book validates women s experiences and provides them with a context for why they feel the way they do which gives meaning to why they smoke While supporting women in their personal choices to smoke or not to smoke it encourages them to seriously consider the risks involved and to consider ways of improving their situation and self care

The Age of Smoke Frank Uekötter,2009-02-15 In 1880 coal was the primary energy source for everything from home heating to industry Regions where coal was readily available such as the Ruhr Valley in Germany and western Pennsylvania in the United States witnessed exponential growth yet also suffered the greatest damage from coal pollution These conditions prompted civic activism in the form of anti smoke campaigns to attack the unsightly physical manifestations of coal burning This early period witnessed significant cooperation between industrialists government and citizens to combat the smoke problem It was not until the 1960s when attention shifted from dust and grime to hazardous invisible gases that cooperation dissipated and protests took an antagonistic turn *The Age of Smoke* presents an original comparative history of environmental policy and protest in the United States and Germany Dividing this history into distinct eras 1880 to World War I interwar post World War II to 1970 Frank Uekoetter compares and contrasts the influence of political class and social structures scientific communities engineers industrial lobbies and environmental groups in each nation He concludes with a discussion of the environmental revolution arguing that there were indeed two environmental revolutions in both countries one societal where changing values gave urgency to air pollution control the other institutional where changes in policies tried to catch up with shifting sentiments Focusing on a critical period in environmental history *The Age of Smoke* provides a valuable study of policy development in two modern industrial nations and the rise of civic activism to combat air pollution As Uekoetter s work reveals the cooperative approaches developed in an earlier era offer valuable lessons and perhaps the best hope for future progress Successes And Failures Of Health Policy In Europe: Four Decades Of Divergent Trends And Converging Challenges Mackenbach, Johan,McKee, Martin,2013-03-01 This book will help those involved in health policy making to understand the various successes and failures of health policies around Europe and
