Smarandache Loops:

Smarandache Loops W. B. Vasantha Kandasamy, 2002 Generally in any human field a Smarandache Structure on a set A means a weak structure W on A such that there exists a proper subset B which is embedded with a stronger structure S . By proper subset one understands a set included in A different from the empty set from the unit element if any and from A . These types of structures occur in our every day's life that's why we study them in this book. As an example a non empty set L is said to form a loop if on L is defined a binary operation called product denoted by $\cdot$ such that For all $a, b \in L$ we have $a \cdot b \in L$ closure property There exists an element $e \in L$ such that $a \cdot e = e \cdot a = a$ for all $a \in L$ e is the identity element of L For every ordered pair $a, b \in L$ there exists a unique pair $x, y \in L$ such that $ax = b$ and $ya = b$. Whence a Smarandache Loop or S loop is a loop L such that a proper subset M of L is a subgroup with respect to the same induced operation **Mathematical**

relationships and connections between and among the various Smarandache concepts and notions that have been developed. This monograph is structured into six chapters. The first chapter is an introduction to the theory of quasigroups and loops with much attention paid to those quasigroup and loop concepts whose Smarandache versions are to be studied in the other chapters. In chapter two the holomorphic structures of Smarandache loops of Bol Moufang type and Smarandache loops of non Bol Moufang type are studied. In the third chapter the notion of parastrophe is introduced into Smarandache quasigroups and studied. Chapter four studies the universality of some Smarandache loops of Bol Moufang type. In chapter five the notion of Smarandache isotopism is introduced and studied in Smarandache quasigroups and loops. In chapter six by introducing Smarandache special mappings in Smarandache groupoids the Smarandache-Bryant-Schneider group of a Smarandache loop is developed. **Scientia Magna, vol. 2, no. 4, 2006** Zhang Wenpeng, Papers on Smarandache inversion sequence global attractivity of a recursive sequence Smarandache fantastic ideals of Smarandache BCI algebras translational hull of superabundant semigroups with semilattice of idempotents the Universality of some Smarandache loops of Bol Moufang type and other similar topics Contributors M Karama P Zhang W Kandasamy M Khoshnevisan K Ilanthenral M Bencze H Ibstedt W Zhu J Earls and many others.
