Successful Aging Perspectives From The Behavioral Sciences:

Successful Aging Paul Boris Baltes, Margret M. Baltes, 1993-05-28 More and more people live into old age This demographic revolution underscores the fact that old age is the last uncharted and unattended phase of the life cycle

Successful Aging Margret M. Baltes, Paul B. Baltes, 1993 **Successful aging : perspectives from the behavioral sciences** Paul B. Baltes, 1990 The Berlin Aging Study Paul B. Baltes, Karl Ulrich Mayer, 2001-03-19 The present and future of our society are shaped by an ever increasing proportion of old and very old people The Berlin Aging Study is one of the largest interdisciplinary efforts to explore old age and aging Unique aspects of the Berlin Aging Study are the spectrum of scientific disciplines involved the range of discipline specific and interdisciplinary research topics the focus on very old age 70 to over 100 years and the empirical reference to a representative heterogeneous urban population The study's first cross sectional findings on intellectual abilities self and personality social relationships physical health functional capacity medical treatment mental disorders such as depression and dementia socioeconomic conditions activities everyday competence subjective well being and gender differences are reported in depth in this book The study was carried out in the context of the Berlin Brandenburg Academy of Sciences study group on Aging and Social Development The authors primarily conduct their research at the Berlin Max Planck Institute for Human Development the Free University of Berlin and the Humboldt University Berlin The Encyclopedia of Aging Richard Schulz, 2006 Print CourseSmart **Aging in the Twenty-first Century** Len Sperry, Harry Prosen, 2021-04-14 Covering a wide range of topics this collection of original essays deals with the consequences and challenges of our growing aging population on society It emphasizes aging as a developmental process while addressing the future of the practice of geropsychiatry and geriatric psychotherapy This book serves as a valuable resource to guide clinical training practice and research on aging into the next century and beyond **Social Support Networks, Coping and Positive Aging Among the Community-Dwelling Elderly in Hong Kong** Susu Liu, 2019-01-04 The dramatically increasing aging population of Hong Kong has elicited new risks and opportunities to facilitate a positive life for older adults This book offers a holistic review of gerontological theories and literature and constructs a conceptual framework of social support networks coping and positive aging In light of the implications of the convoy model of social support to depict an indigenous landscape of positive aging in Hong Kong this is one of the very few empirical studies that adopts both quantitative research and qualitative research The research consisted of a pilot study of in depth interviews with 16 older Hong Kong Chinese and a main study surveying 393 older members of District Elderly Community Center The results of the study indicate that family and peer support constitute the mainstay of support networks of the elderly and that family and peer support are associated with positive aging Moreover the study shows that it is the depth of emotional closeness namely close interaction and intimacy with social partners that makes the greatest contribution to positive aging Additionally problem coping and emotion coping are found to mediate the relationship between social support networks and

positive aging There is potential in bringing more domestic helpers into elderly care and improving the service quality such that the goal of Aging in Place can be promoted in Hong Kong Intended for researchers in social work gerontology and positive psychology it is also essential reading for graduates and social work professionals interested in this area This book makes a valuable contribution to social gerontological research among Hong Kong older adults and the promotion of wellbeing in the elderly via the construct of positive aging in the culture of Chinese society **Foundations of Health**

Psychology Howard S. Friedman, Roxane Cohen Silver, 2007 Health psychology is the scientific study of psychological processes related to health and health care Although the field is only 25 years old it has burgeoned into a major scientific and clinical discipline Health psychology has excellent scientific journals thousands of scientists and practitioners and many students Yet there has not been a sufficient statement or explication of the foundational concepts upon which this flourishing field is built Foundations of Health Psychology brings together top experts to provide a much needed conceptual base for this rapidly expanding field Rather than take a medical model approach the volume examines health psychology from a theoretical conceptual and psychological perspective After presenting an overview of the field's history and methods the contributors address core concepts of the biopsychosocial approach to health and then discuss applications to health promotion and illness prevention and treatment Providing a deep understanding of the intellectual foundations of health psychology this volume will be invaluable for both new and experienced researchers as well as students and other scholars seeking a firm basis for successful research and practice The Palgrave Handbook of Age Diversity and Work Emma

Parry, Jean McCarthy, 2016-11-26 This Handbook incorporates a variety of disciplines and approaches in order to provide a comprehensive and authoritative examination of the issues that result from increasing age diversity at work Despite interest in this area exploding over the past few years amongst academics practitioners and policy makers the analysis of age diversity has remained primarily within disciplinary silos such as Psychology or Sociology with a focus on ageing or generational differences rather than a combination of approaches to understanding age diversity Unique in its coverage of multiple perspectives it considers not only generational and ageing perspectives to age diversity but also highlights the importance of context in driving both the impact and response to this issue The Palgrave Handbook of Age Diversity and Work includes contributions from leading scholars in age and generational diversity from across the world discussing cutting edge research findings about the nature and impact of age diversity and presenting approaches to managing this phenomenon

phenomenon **Positive Leisure Science** Teresa Freire, 2012-12-15 This book extends positive psychology by embedding leisure into the positive science field following a new paradigm and aggregating various domains and fields Positive science can be applied to the field of leisure and in turn leisure can serve as an arena to study some of the most important optimal functioning variables The book presents knowledge on a diverse range of topics about optimizing socio cognitive processes and behaviors places and contexts societies and cultures through leisure These topics are unified by an underlying continuum

that extends from individuals and subjective experiences to social worlds The contributions highlight components of everyday life showing that subjective experience and life trajectories are structured and social goals and life purposes are defined and achieved within interactions between individuals and their lived contexts and environments in daily life
