

Twelve Tips on Writing a Good Scientific Paper

John A. Eleftheriades, M.D., F.I.C.A.

Department of Cardiothoracic Surgery, Yale University School of Medicine, New Haven, Connecticut

It is an indication of Dr. Chang's wisdom and experience in academic matters that he should commission an article on the technique of writing a good scientific paper. There are many pitfalls to which the new or occasional writer is prone. Also, the manner of presentation can make a great deal of difference as to how favorably research information is received by editors and can impact the usefulness of the paper to readers.

The compilation which follows incorporates suggestions which the author hopes will be of use in writing scientific papers. Much of this was taught to the author by his mentors, and much was learned (the hard way) by experience. This list is not meant to be exhaustive, but rather to cover certain important general principles regarding how to present one's research data for scientific publication.

Good Underlying Research Question

1. A good research paper needs to start with a good research question—a question to which the reader wants to know the answer. If the underlying question is not pertinent or interesting or of clinical importance, no one will want to know the answer, and no one will be interested in accepting or reading the resulting paper. At what size does an aneurysmal aorta rupture? How often are infectious pathogens found in atheroma removed at surgery? Does revascularization improve ventricular function in patients with ischemic cardiomyopathy? What is the influence of antecedent pulmonary hypertension on mortality in heart transplantation? Can arteriosclerosis occur in the absence of interferon- γ ? These are all examples of research questions in angiology that produced published papers which proved of interest to readers. Good basic questions that stimulate research—both in the laboratory and the clinic—arise from the investigator's experience and creativity. With-

out such worthy underlying questions, the resulting manuscript will not be of interest to editors, nor will the paper capture readers' attention. Most often, for clinical papers, a well-chosen question will impact substantially on clinical management of real-world patients.

Brevity

2. The paper must be concise. This is often a hard concept for scientific writers just starting out. The new scientific writer is often not accustomed to the brevity of scientific communication, which is very different from other forums. Excess length is not as much an issue for a thesis or for general prose or fiction. But, the scientific reader is hard-pressed for time. For scientific journals, space is at a premium. You must state your concept, methods, results, conclusions, and discussion succinctly, with as few words, Tables, Figures, and References as possible. With experience, you will come to realize just how much can be cut without adversely affecting conveyance of your message. I learned this concept from Dr. Arthur Baue, my former Chairman, who cut a chapter I had written on diaphragm pacing dramatically without curtailing its message whatsoever. Dr. Baue, editor of Glenn's Textbook of Thoracic and Cardiovascular Surgery, taught me just how much of what we put on paper is repetitious or unnecessary to convey our meaning. I learned this concept also from Dr. William Roberts, editor of the American Journal of Cardiology. Dr. Roberts has a reputation for cutting and cutting without detracting in any way from the substance of a report. This is a very important talent for the novice scientific writer to learn.

Abstract Conveys All Critical Information

3. The abstract must convey all the cardinal findings and messages. Please remember that even the an avid reader of your work will read your abstract and at most look at some of your figures, skim your methods and results, and glance at your discussion and con-

A Student's Guide to Writing a Scientific Paper Alan A. Gubanich, 1994-04-01 [How to Write a Scientific Paper](#) Jari Saramäki, 2018-11-03

What if writing scientific papers was faster easier and a bit less painful This book provides a step by step top down approach that makes it easier to turn your hard won results into research papers that your fellow scientists want to read and cite I just wrote a rough first draft of a paper during a 3 hour flight and if it wasn't for these teachings this would have taken me days if not weeks Talayeh Aledavood James S McDonnell Postdoctoral Fellow University of Helsinki The book's systematic approach builds on what I've learned through coauthoring close to 100 research papers with students You'll learn how to outline your paper from top to down how to develop your story and how to think about what to write before you write it You'll also learn how to deal with many issues that writers of science commonly face from the fear of the blank page to dealing with critical reviews Here's what you get A complete step by step plan for writing a scientific paper from choosing which results to include to wrapping up the paper in the Discussion section Concrete actionable and practical advice from a paragraph level template for the Introduction to guidance on preparing plots and figures Lots of writing tips from placing signposts in your text to shortening and straightening your sentences This book has been written for the PhD student who is aiming to write a journal article on her research results but it should also be useful to any scientist who has ever found writing difficult Whatever the stage of your career if you'd like to learn how to write research papers systematically and efficiently this is the book for you The book includes PART I STORY 1 How To Choose The Key Point Of Your Paper 2 How To Choose The Supporting Results 3 How To Write The Abstract 4 How To Choose The Title PART II OUTLINE 5 The Power Of Outlining 6 How To Write The Introduction Part I Structure 7 How To Write The Introduction Part II A Four Paragraph Template 8 How To Write The Introduction Part III The Lede 9 How To Write The Materials And Methods 10 How To Write The Results Part I Figures 11 How To Write The Results Part II Text 12 How To Write The Discussion PART III WORDS 13 How Does Your Reader Read 14 How To Write Your First Draft 15 How To Edit Your First Draft 16 Tips For Revising Content And Structure 17 Tips For Editing Sentences PART IV IT'S NOT OVER YET 18 How To Write The Cover Letter 19 How To Deal With Reviews About the author I am a professor of computational science and an experienced academic with around 100 published papers My research is interdisciplinary to say the least I have studied the social fabric of smartphone users the genetic structure of ant supercolonies the connectome of the human brain networks of public transport and the molecular biology of the human immune system to name a few So one could say that I have a broad range of scientific interests or that I simply cannot choose But that's exactly the way I like it **The High School**

Student's Guide to Writing a Research Paper Janine Carlock, Maeve Eberhardt, Jaime Horst, Peter Kolenich, 2017-06-13

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of *Writing a Research Paper* by Lionel Menasche 1998 and partly a companion to *The ESL Writer's Handbook*. Each section of the book includes a discrete task called a Building Block which requires students to apply the skills learned toward the development of their own paper. This step by step approach allows students to construct knowledge as they become more familiar with the process making writing a research paper a less intimidating task. Special features: This guide uses simple direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first year writing class including two sample papers one in APA and one in MLA. A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.

A Student Guide to Writing Research Reports, Papers, Theses and Dissertations Cathal Ó Siochrú, 2022-11-10. This useful guide for students combines all the guidance advice and key tips needed to write successful research reports theses or dissertations exploring in detail each of the elements involved in writing an academic paper. The book will guide you through all the key sections of a report including the introduction literature review method results discussion and more. Each chapter contains instructions and advice aimed at three different levels of report writing experience. The basics covers the basic purpose and structure of each section as well as the most common mistakes. Refinements helps you to develop your report writing skills beyond the basics adding polish and depth and Advanced offers advice and insight into the most complex issues in report writing. In addition to the guidance there are examples to show you the principles of report writing in action and exercises which allow you to test your understanding as you learn. An essential reference for any student writing an academic paper. *A Student Guide to Writing Research Reports Papers Theses and Dissertations* is the ideal resource to be used as part of your independent study or when working with a supervisor.

Student's Guide to Writing College Papers, Fifth Edition Kate L. Turabian, 2019-06-28. Students of all levels need to know how to write a well reasoned coherent research paper and for decades Kate L. Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. For its fifth edition Chicago has reconceived and renewed this classic work for today's generation. Addressing the same range of topics as Turabian's *A Manual for Writers of Research Papers Theses and Dissertations* but for beginning writers and researchers this guide introduces students to the art of formulating an effective argument conducting high quality research with limited resources and writing an engaging class paper. This new edition includes fresh examples of research topics clarified terminology more illustrations and new information about using online sources and citation software. It features updated citation guidelines for Chicago MLA and APA styles aligning with the

latest editions of these popular style manuals It emphasizes argument research and writing as extensions of activities that students already do in their everyday lives It also includes a more expansive view of what the end product of research might be showing that knowledge can be presented in more ways than on a printed page Friendly and authoritative the fifth edition of Student s Guide to Writing College Papers combines decades of expert advice with new revisions based on feedback from students and teachers Time tested and teacher approved this book will prepare students to be better critical thinkers and help them develop a sense of inquiry that will serve them well beyond the classroom Research Richard Veit,1998 Unlike comparable books Research introduces two sample student research papers in the second chapter giving students a clear idea of their final goal as they progress through each step of the research and writing process While covering all the basic research conventions the book places a unique emphasis on the actual purpose behind the conventions helping students develop research skills useful across the curriculum This book is equally effective as a classroom text and as a reference tool for student researchers Research Veit,Branscomb,1999-07-01 Student's Guide to Writing College Papers Kate L. Turabian,2010-04-15 High school students two year college students and university students all need to know how to write a well reasoned coherent research paper and for decades Kate Turabian s Student s Guide to Writing College Papers has helped them to develop this critical skill In the new fourth edition of Turabian s popular guide the team behind Chicago s widely respected The Craft of Research has reconceived and renewed this classic for today s generation Designed for less advanced writers than Turabian s Manual of Writers of Research Papers Theses and Dissertations Seventh Edition Gregory G Colomb and Joseph M Williams here introduce students to the art of defining a topic doing high quality research with limited resources and writing an engaging and solid college paper The Student s Guide is organized into three sections that lead students through the process of developing and revising a paper Part 1 Writing Your Paper guides students through the research process with discussions of choosing and developing a topic validating sources planning arguments writing drafts avoiding plagiarism and presenting evidence in tables and figures Part 2 Citing Sources begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work Chicago MLA and APA all with full coverage of electronic source citation Part 3 Style covers all matters of style important to writers of college papers from punctuation to spelling to presenting titles names and numbers With the authority and clarity long associated with the name Turabian the fourth edition of Student s Guide to Writing College Papers is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers Classroom tested and filled with relevant examples and tips this is a reference that students and their teachers will turn to again and again
