Marx and Contemporary Scientific Thought International Council for Philosophy and Humanistic Studies, Paris > Symposium on the Role of Karl Marx in the Development of Contemporary Scientific Thought, 2022-09-06 No detailed description available for Marx and Contemporary Scientific Thought *Media on a Political Level* Stavros Arabatzis, 2025-08-03 The volume presented here seeks to shift the concept of media from its traditional domain to the political field Media are not merely to be understood as an intellectual or aesthetic game communicative linguistic written technical profit rational instrumental hermeneutic or mathematical informational but rather as a political state of emergency This media theory therefore addresses the question of why humanity instead of entering a truly human state is sinking into a new kind of barbarism Adorno Horkheimer According to our thesis this is a medial question one that arises from the original inverse setting kata strophēn of media and it subsequently determines their historical societal social and political development The main thesis of this book is that we are no longer dealing with media as a theoretical technical aesthetic or informational game Rather we are dealing with a political state of emergency where the issue is truth or falsehood within the polis and its prevailing laws These are two fundamentally different domains intellectual and aesthetic play on the one hand and political emergency on the other that must not be confused because the latter is existential and concerns life or death Today media themselves have become cultural technical economic and political weapons concealing both their essence and non essence As a result the once metaphorical character of technicist media theory war as the essence of media Kittler has been lost and media have been transferred into the political geopolitical financial and informational economic realm Kittler's media theoretical thesis media as military equipment media as repurposed war devices misunderstood in their function as long as their primary military purpose is ignored is according to our thesis in this book not to be understood as technical but as political state related and socio economic pre state Media theory thus becomes Stasiology theory of civil war and Polemology theory of war This antagonistic polemical principle sharpens the focus on all media in the public sphere such that the agonistic principle of struggle C Mouffe is merely a preliminary stage and still remains within the realm of play Therefore our concluding thesis is that we do not need a technical hermeneutic aesthetic phenomenological anthropological or ontological a priori to explain the essence or non essence of media What we need is a Stasiology and a Polemology capable of unlocking the entire antagonistic polemical field of media in the public sphere Only this sharpening of media in the public sphere allows us to move beyond the antagonistic polemical principle itself **Philosophisches Jahrbuch** Constantin Gutberlet, 1992 *Dürrenmatt und Kierkegaard* Annette Mingels, 2003 Ohne Kierkegaard bin ich als Schriftsteller nicht zu verstehen Wiederholt ausserte sich Friedrich Dürrenmatt in Interviews und Reden in poetologischen und autobiographischen Aufzeichnungen zur kierkegaardschen Philosophie Ohne Zweifel ist die Wirkung der Religionsphilosophie Søren Kierkegaards 1813 1855 nicht nur auf die Theologie und Philosophie sondern auch auf die europäische Dichtung seit Ende

des 19. Jahrhunderts von grosser Bedeutung. Die Autorin weist systematisch nach, dass Parallelen zwischen Kierkegaard und Dürrenmatt nicht nur in theologischer und stiltheoretischer Hinsicht, sondern auch im philosophischen wie politischen Denken beider Autoren bestehen. Dabei wird der gemeinsame Nenner der Denkformen Kierkegaards und Dürrenmatts benannt. Die Kategorie des Einzelnen. Der Einzelne ist hierbei als Inbegriff des subjektiv Existierenden zu verstehen, dessen Dialektik darin besteht, ebenso der Einzige von Allen wie Jedermann, ebenso Vereinzelter wie Teil der Allgemeinheit zu sein. In der Überschreitung des rein literaturwissenschaftlichen Diskurses in Richtung Philosophie, Theologie, Geschichte und Soziologie wird zugleich ein grundsätzliches Verständnis beider Autoren gefordert. *Psychodrama und Gesellschaft* Ferdinand Buer, 2010-04-27. Jakob Levy Moreno hatte die Vision von einer Gesellschaft, die von den Menschen nach ihren Vorstellungen gemeinsam gestaltet wird. Mit den sozialwissenschaftlich fundierten Aktionsmethoden Psychodrama und Soziometrie hat Moreno Wege gezeigt, wie dieser Prozess eingeleitet werden kann. Der Autor rekonstruiert dieses einzigartige basisdemokratische Projekt und zeigt an den Arbeitsformaten Supervision, Coaching und Organisationsberatung, wie dieser Anspruch auch in der heutigen Arbeitswelt umgesetzt werden kann. **Unbewältigte Vergangenheit** Gerhard Lozek, Helmut Meier, Walter Schmidt, Werner Berthold, 1970-12-31. Keine ausführliche Beschreibung für Unbewältigte Vergangenheit verfügbar. The Oxford Handbook of German Philosophy in the Nineteenth Century Michael N. Forster, Kristin Gjesdal, 2015-02-05. The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history. The volume is divided into four parts. The first part explores individual philosophers including Fichte, Hegel, Schopenhauer, Marx, and Nietzsche amongst other great thinkers of the period. The second addresses key philosophical movements: Idealism, Romanticism, Neo-Kantianism, and Existentialism. The essays in the third part engage with different areas of philosophy that received particular attention at this time, including philosophy of nature, philosophy of mind, philosophy of language, philosophy of history, and hermeneutics. Finally, the contributors turn to discuss central philosophical topics from skepticism to materialism, from dialectics to ideas of historical and cultural Otherness, and from the reception of antiquity to atheism. Written by a team of leading experts, this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research.

Metaphilosophy as a Unified Discipline Michael Lewin, 2025-08-13. Since the 1960s, the emerging discipline of metaphilosophy has been burdened by the problem of the philosophical preconditioning of metaphilosophical theories. This issue is addressed through the epistemological framework of perspectivism. It is demonstrated that a profound understanding of perspectivity can positively influence the quality of metaphilosophical research, whose unity is only possible under the idea of a discourse oriented toward cross-perspective integration from the outset. Politische Philosophie in der Weimarer Republik Norbert J. Schürgers, 2016-12-17. *Heredity Produced* Staffan Müller-Wille, Hans-Jörg Rheinberger, 2007. The cultural history of heredity: scholars from a range of disciplines discuss the evolution of the concept of heredity from the Early

Modern understanding of the act of generation to its later nineteenth century definition as the transmission of characteristics across generations Until the middle of the eighteenth century the biological makeup of an organism was ascribed to an individual instance of generation involving conception pregnancy embryonic development parturition lactation and even astral influences and maternal mood rather than the biological transmission of traits and characteristics Discussions of heredity and inheritance took place largely in the legal and political sphere In *Heredity Produced* scholars from a broad range of disciplines explore the development of the concept of heredity from the early modern period to the era of Darwin and Mendel The contributors examine the evolution of the concept in disparate cultural realms including law medicine and natural history and show that it did not coalesce into a more general understanding of heredity until the mid nineteenth century They consider inheritance and kinship in a legal context the classification of certain diseases as hereditary the study of botany animal and plant breeding and hybridization for desirable characteristics theories of generation and evolution and anthropology and its study of physical differences among humans particularly skin color The editors argue that only when people animals and plants became more mobile and were separated from their natural habitats through exploration colonialism and other causes could scientists distinguish between inherited and environmentally induced traits and develop a coherent theory of heredity Contributors David Sabeau Silvia De Renzi Ulrike Vedder Carlos Lopez Beltrán Phillip K Wilson Laure Cartron Staffan Müller Wille Marc J Ratcliff Roger Wood Mary Terrall Peter McLaughlin François Duchesneau Ohad Parnes Renato Mazzolini Paul White Nicolas Pethes Stefan Willer Helmuth Müller Sievers
