Studies In Syntactic Typology Typological Studies In Language:

Studies in Syntactic Typology Michael Hammond, Edith A. Moravcsik, Jessica Wirth, 1988-01-01 The papers in this volume are revised versions of presentations at the conference on Language Universals and Language Typology in March 1985 at the University of Wisconsin Milwaukee They include new proposals of universals results of investigations to validate or refine previously proposed universal generalizations and discussions concerning the explanation of universals The volume will be of great interest to researchers in syntax and in language universals In addition scholars in pragmatics philosophy of linguistics psycholinguistics anthropological linguistics and semantics will also find articles of interest in the book *Typological Studies* Guglielmo Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed internally headed and headless relative clauses

Structure and Function □ A Guide to Three Major Structural-Functional Theories Christopher S.

Butler, 2003-06-30 This book and its companion volume present a detailed guide to three major structural functional theories Functional Grammar Role and Reference Grammar and Systemic Functional Grammar This first volume provides the necessary background through a discussion of the characteristics of functional theories followed by a brief analysis of six approaches to language in the light of this discussion These chapters lead to a characterization of a smaller set of structural functional grammars among which FG RRG and SFG are central An overview of each of these theories in relation to the simplex clause is then presented followed by a more critical comparison The remainder of the book deals with the structure and meaning of phrasal units the representation of situations and the treatment of tense aspect modality and polarity across the three theories A major feature of the book is the use of examples from corpora of English and other languages which serve not only to exemplify theoretical and descriptive claims but also at times to challenge them **Athabaskan**

Language Studies Robert W. Young, 1996 Many leading figures in the field of Athabaskan languages contributed to this volume and their range of topics matches Robert Young's interests Four papers deal with northern Athabaskan languages which Young studied in the 1930s The remaining essays focus on aspects of Navajo language and culture Young has specialized in this area for over fifty years in collaboration with his mentor William Morgan Sr Several essays present detailed analysis of verb and sentence structure in Navajo two are studies of Navajo literacy another examines Navajo philosophy and one offers the first study of how children learn the complexities of the Navajo verb Anyone interested in Navajo studies or Athabaskan languages will find these essays invaluable **Comparative and Contrastive Studies of**

Information Structure Carsten Breul, Edward Göbbel, 2010 The present book contains a selection of articles based on papers presented at the conference on Contrastive Information Structure Analysis organised by Carsten Breul at the University of Wuppertal in March 2008 Pref *Studies in Language and Cognition* Mats Andréén, Marlene Johansson Falck, Jordan Zlatev, 2008-12-18 Using a plethora of concepts theories and methods the theoretical and empirical studies described in this volume are united in their approach of treating language not in isolation e g as a module but as both based on structures and processes of cognition and at the same time as affecting the human mind The book is organized in 7 parts corresponding to some of the major fields in language research today a linguistic meta theory and general issues b lexical meaning c metaphor d grammar e pragmatics f gesture and bodily communication and g historical linguistics At the same time the non modular approach to language adopted by the authors is reflected by the fact that there are no strict boundaries between the parts Thus the book is a valuable contribution to the growing interdisciplinary field of Language and Cognition

Iconicity and Analogy in Language Change Janice Aski, Cinzia Russi, 2015-09-25 This book examines the alternation between accusative dative and dative accusative order in Old Florentine clitic clusters and its decline in favor of the latter Based on an exhaustive analysis of data collected from medieval Florentine and Tuscan texts we offer a novel analysis of the rise of the variable order the transition from one order to the other and the demise of the alternation that relies primarily on iconicity and analogy The book employs exophoric pragmatic iconicity a language external iconic relationship based on similarity between linguistic structure and the speaker writer s conceptualization of reality and endophoric iconicity a language internal iconic relationship where the iconic ground is construed between linguistic signs and structures Analogy is viewed as a productive process that generalizes patterns or extends grammatical rules to formally similar structures and obtains the form of the analogical relationship between the masculine singular definite article and the third person singular accusative clitic which shared the same phonotactically constrained distribution patterns The data indicate that exophoric pragmatic iconicity exploits and maintains the alternation whereas endophoric iconicity and analogy conspire to end it

Information Structure and Syntactic Change in Germanic and Romance Languages Kristin Bech, Kristine Gunn Eide, 2014-05-15 The contributions of this volume offer new perspectives on the relation between syntax and information structure in the history of Germanic and Romance languages focusing on English German Norwegian French Spanish and Portuguese and both from a synchronic and a diachronic perspective In addition to discussing changes in individual languages along the syntax information structure axis the volume also makes a point of comparing and contrasting different languages with respect to the interplay between syntax and information structure Since the creation of increasingly sophisticated annotated corpora of historical texts is on the agenda in many research environments methods and schemes for information structure annotation and analysis of historical texts from a theoretical and applied perspective are discussed

The Diachrony of Negation Maj-Britt Mosegaard Hansen, Jacqueline Visconti, 2014-10-15 Despite intensive research

negation remains elusive Its expression across languages its underlying cognitive mechanisms its development across time and related phenomena such as negative polarity and negative concord leave many unresolved issues of both a definitional and a substantive nature Such issues are at the heart of the present volume which presents a twofold contribution The first part offers a mix of large scale typological surveys and in depth investigation of the evolution of negation in individual languages and language families that have not frequently been studied from this point of view such as Chinese Berber Quechua and Austronesian languages The second part centers on French a language whose early stages are comparatively richly documented and which therefore provides an important test case for hypotheses about the diachrony of negative marking Representing moreover a variety of theoretical approaches the volume will be of interest to researchers on negation language change and typology *Explanation in Historical Linguistics* Garry W. Davis, Gregory K. Iverson, 1992-10-15 This is the first of two volumes deriving from papers presented at the Nineteenth Annual UVM Linguistics Symposium held in Milwaukee in April 1990 The contributions in this volume investigate the general question of what constitutes an explanation of diachronic change and illustrate their proposals in the context of various specific problems in historical linguistics The present volume also includes a solicited paper by Eric P Hamp On remote reconstruction that addresses the validity of distant reconstructions like those of Nostratic and Proto World
