The Unaccented Vowels of Proto-Norse Martin Syrett, 1994-01-01 The Unaccented Vowels of Proto-Norse attempts to analyse the unaccented vowel system attested in the proto-Norse period as partially attested in the older runic inscriptions in the elder futhork Each chapter in turn assesses the evidence for unaccented syllables of a particular category whether inflectional or derivational and decides whether any reliable conclusions can be drawn from it It is argued that too many widely accepted views are based on insufficient and poor methodology and that too little note has been taken of the fact that viable alternatives exist alongside most of our theories about proto-Norse In particular a new realisation that the inscriptions are written in a less than perfect orthographic system a notion that many scholars have often been unwilling to accept leads to some interesting new interpretations of the data
