Studies Voltaire 18th Century Volume 255:

The Newton Wars & the Beginning of the French Enlightenment J.B. Shank, 2024-05-31 Nothing is considered more natural than the connection between Isaac Newton's science and the modernity that came into being during the eighteenth century Enlightenment. Terms like Newtonianism are routinely taken as synonyms for Enlightenment and modern thought yet the particular conjunction of these terms has a history full of accidents and contingencies. Modern physics for example was not the determined result of the rational unfolding of Newton's scientific work in the eighteenth century nor was the Enlightenment the natural and inevitable consequence of Newton's eighteenth century reception. Each of these outcomes in fact was a contingent event produced by the particular historical developments of the early eighteenth century. A comprehensive study of public culture *The Newton Wars and the Beginning of the French Enlightenment* digs below the surface of the commonplace narratives that link Newton with Enlightenment thought to examine the actual historical changes that brought them together in eighteenth century time and space. Drawing on the full range of early modern scientific sources from studied scientific treatises and academic papers to book reviews, commentaries, and private correspondence, J. B. Shank challenges the widely accepted claim that Isaac Newton's solitary genius is the reason for his iconic status as the father of modern physics and the philosophemovement.

Against War and Empire Richard Whatmore, 2012-07-31 As Britain and France became more powerful during the eighteenth century, small states such as Geneva could no longer stand militarily against these commercial monarchies. Furthermore, many Genevans felt that they were being drawn into a corrupt commercial world dominated by amoral aristocrats dedicated to the unprincipled pursuit of wealth. In this book, Richard Whatmore presents an intellectual history of republicans who strove to ensure Geneva's survival as an independent state. Whatmore shows how the Genevan republicans grappled with the ideas of Rousseau, Voltaire, Bentham, and others in seeking to make modern Europe safe for small states by vanquishing the threats presented by war and by empire.

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989-08-17 In this work, Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought: the idea of human nature. Human nature was commonly seen as a broadly universal, unchanging entity, though perhaps modifiable by geographical, social, and historical factors. Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age. Evidence here is drawn from Diderot's celebrated *Encyclopedia* and from a vast range of writing by such Enlightenment notables as Voltaire, Rousseau, and d'Holbach. Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity. He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature, there were also cracks in this concept that developed during the Enlightenment itself.

Physical Chemistry from Ostwald to Pauling John W. Servos, 2021-05-11 John Servos explains the emergence of physical chemistry in America by

presenting a series of lively portraits of such pivotal figures as Wilhelm Ostwald A A Noyes G N Lewis and Linus Pauling and of key institutions including MIT the University of California at Berkeley and Caltech In the early twentieth century physical chemistry was a new hybrid science the molecular biology of its time The names of its progenitors were familiar to everyone who was scientifically literate studies of aqueous solutions and of chemical thermodynamics had transformed scientific knowledge of chemical affinity By exploring the relationship of the discipline to industry and to other sciences and by tracing the research of its leading American practitioners Servos shows how physical chemistry was eclipsed by its own offspring specialties like quantum chemistry

The Passionate Society Lisa Hill, 2006-10-12 Adam Ferguson 1723-1816 was a major figure of the Scottish Enlightenment whose thought was in many respects original and distinctive This book is a study of his ideas and of the intellectual forces that shaped them Though somewhat overlooked in the nineteenth century Ferguson was rescued from obscurity in the first half of the twentieth century by scholars interested in the origins of sociology and early critiques of modernity Ferguson's interest in the mechanics of social life and especially social change led him to many groundbreaking insights In fact he is sometimes identified as the Father of Modern Sociology In addition to exploring whether or not he merits this title this study examines the whole of Ferguson's thought as a system and includes his moral and faculty psychology historiography theology politics and social science Ferguson is distinguished by his deep appreciation of the complexity of the human condition his study of society is based on the belief that it is not only reason but the unseen unplanned sub-rational and visceral forces that keep the human universe in motion Ferguson's appreciation of this fact and his ability to make social science of it is his major achievement

Ordering the World in the Eighteenth Century Frank O'Gorman, Diana Donald, 2005-12-14 The Eighteenth century is often represented applying Tom Paine's phrase as The Age of Reason an age when progressive ideals triumphed over autocracy and obscurantism and when notions of order and balance shaped consciousness in every sphere of human knowledge Yet the debates which surrounded the development of Eighteenth century thought were always open to troubling doubts Was nature itself truly an ordered entity as Newton had argued or was it a mass of chaotic randomly moving atoms as some materialist thinkers believed This book explores the tensions and conflicts in these debates through a series of interdisciplinary essays from leading international scholars each challenging the idea that the Eighteenth century was an age of order

Evolutionism in Eighteenth-century French Thought Mary Efrosini Gregory, 2008 This book examines how eighteenth century French theorists Maillet Montesquieu La Mettrie Buffon Maupertuis Diderot Rousseau and Voltaire addressed evolutionism Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long held belief that the chain of beings is fixed This book describes how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be

taught to speak as well as the issue of race and the family of man **The London Corresponding Society, 1792-1799 Vol 1** Michael T Davis, James Epstein, Jack Fruchtman Jr, Mary Thale, 2021-04-14 This six volume set reproduces the complete writings of the London Corresponding Society LCS as well as other contemporary literature and parliamentary debates and reports relating to the Society The LCS was at the forefront of the call for political reform in the late 18th century Volume 1 spans 1792 to 1794 **Encyclopaedic Visions** Richard Yeo, 2001-03-29 The eighteenth century English dictionaries of arts and sciences claimed to contain all knowledge that a person of education should possess These early encyclopaedias responded to the explosion of information by reducing knowledge to essentials stressing the need for a coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written Encyclopaedic Visions provides a major contribution to Enlightenment studies and the history of ideas in general Politics and Philosophy in the Thought of Destutt de Tracy Brian W. Head, 2019-11-21 First published in 1987 This study describes and analyses the published writings of the French philosopher Antoine Destutt de Tracy The author focuses on the three decades from the calling of the Etats g n raux to the early years of the Restoration the period of Tracy s entire literary production and the period of his greatest influence and reputation This title will be of great interest to students of history philosophy and politics
