Development and Principles of International Humanitarian Law Jean Simon Pictet, 1985-09-30 The main aim of this book is to inquire into the system of norms regulating the internationalization of internal conflicts The traditional distinction between international internal conflict which entails different legal consequences is in practice very difficult to detect due to the presence in many instances of elements typical of both situations Through a careful extraordinarily useful examination of all relevant cases of internationalized internal conflict since 1956 the validity of the traditional framework of rules concerning foreign intervention in internal conflict is reassessed At the same time the applicability to these situations of the rules typical of international conflicts are analyzed with a view to providing the existence of a continuum between the two situations not only as a matter of fact but also with respect to their legal regulation

The Development and Principles of International Humanitarian Law Wolff Heintschel von Heinegg, 2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law's development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of *Kriegsraison* Moreover they offer proof of the customary character of the principle of distinction in land air and naval warfare
