

prove that the study of comparative politics and peace studies are most applicable in understanding the causes of war and ways of enhancing peace in the world. In researching on these issues, three questions arise – Why do nations go to war? Why do nations stop fighting? and How can peace be made to last forever?

The Essence of Comparative Politics

Understanding and appreciating the political ideologies of other countries can as well reduce xenophobic attitudes. Ethnocentrism has also been a factor that makes certain nations view others as less-human (Caramani 73). This makes it difficult for ideas of the despised groups to receive recognition at the international front. This is evident with most Middle East nations. The West and other European nations view them as uncivilized and backward. This feeling has caused resentments among states like North Korea, Iran, Syria, and Palestine such that any slight controversial issue can result in war (Richmond 106).

Clearly, the thinking of a person can easily enhance conflict in case of disagreements. Therefore, appreciating the existence of globalization in comparative politics can mitigate chances of nations going to war. Clearly, the concept of globalization comes into play under comparative politics; scholars come to understand the operations of different political systems and through public awareness, people learn to tolerate and appreciate differences in ideologies (Rummel par. 12). For example, communism and capitalism are policies of conservatism and liberalism respectively. The two systems may propagate different policies on various affairs, as well as views and perceptions on conflict resolution.

Dating back to the time of the writing of the Bible, comparative politics has been eminent, especially in the Old Testament where the prophets frequently compared the Israelites to other people like the Syrians (Atack par. 4). Such comparisons helped to understand the way of life of the people of Israel and their neighbors. Another dimension of comparative politics is evident in the works of two ancient Greeks – Aristotle and Plato.
