## **Studies In Pre Vesalian Anatomy:**

*Studies in Pre-Vesalian Anatomy* Levi Robert Lind, 1975 *Anatomie Geschichte* 1600      **The Purple Island and Anatomy in Early Seventeenth-century Literature, Philosophy, and Theology** Peter Mitchell, 2007 Sets out to reconstruct and analyze the rationality of Phineas Fletcher's use of figurality in *The Purple Island* 1633 a poetic allegory of human anatomy This book demonstrates that the analogies and metaphors of literary works share coherence and consistency with anatomy textbooks      **The Feeling Heart in Medieval and Early Modern Europe** Katie Barclay, Bronwyn Reddan, 2019-12-02 The heart is an iconic symbol in the medieval and early modern European world In addition to being a physical organ it is a key conceptual device related to emotions cognition the self and identity and the body The heart is read as a metaphor for human desire and will and situated in opposition to or alongside reason and cognition In medieval and early modern Europe the feeling heart the heart as the site of emotion and emotional practices informed a broad range of art literature music heraldry medical texts and devotional and ritual practices This multidisciplinary collection brings together art historians literary scholars historians theologians and musicologists to highlight the range of meanings attached to the symbol of the heart the relationship between physical and metaphorical representations of the heart and the uses of the heart in the production of identities and communities in medieval and early modern Europe      *A Tribute to Adam Politzer* A. Mudry, 2015-02-02      **The Wine-Dark Sea Within** Dr. Dhun Sethna, 2022-06-07 A revisionist history of medicine in which blood plays the starring role Inspired by Homer's description of the ebb and flow of the wine dark sea the ancient Greeks conceived a back and forth movement of blood That false notion perpetuated by the influential Roman physician Galen prevailed for fifteen hundred years until William Harvey proved that blood circulates the heart pumps blood in one direction through the arteries and it returns through the veins Harvey's discovery revolutionized the life sciences by making possible an entirely new quantitative understanding of the cardiovascular system a way of thinking on which many of our lifesaving medical interventions today depend In *The Wine Dark Sea Within* cardiologist Dhun Sethna argues that Harvey's revelation inaugurated modern medicine and paved the way for groundbreaking advances from intravenous therapy cardiac imaging and stent insertions to bypass surgery dialysis and heart lung machines Weaving together three thousand years of global history following bitter feuds and epic alliances tragic failures and extraordinary advancements this is a provocative history by a fresh voice in popular science      **Books of the Body** Andrea Carlino, 1999-12-15 We usually see the Renaissance as a marked departure from older traditions but Renaissance scholars often continued to cling to the teachings of the past For instance despite the evidence of their own dissections which contradicted ancient and medieval texts Renaissance anatomists continued to teach those outdated views for nearly two centuries In *Books of the Body* Andrea Carlino explores the nature and causes of this intellectual inertia On the one hand anatomical practice was constrained by a reverence for classical texts and the belief that the study of anatomy was more properly part of natural philosophy than of medicine On the other hand

cultural resistance to dissection and dismemberment of the human body as well as moral and social norms that governed access to cadavers and the ritual of their public display in the anatomy theater also delayed anatomy's development. A fascinating history of both Renaissance anatomists and the bodies they dissected; this book will interest anyone studying Renaissance science, medicine, art, religion, and society. *Bodily Extremities* Florike Egmond, Robert

Zwijnenberg, 2017-03-02 A strong preoccupation with the human body often manifested in startling ways is a characteristic shared by early modern Europeans and their present-day counterparts. Whilst modern manifestations of this interest include body piercing, tattoos, plastic surgery, and eating disorders, early modern preoccupations encompassed such diverse phenomena as monstrous births and physical deformity, body snatching, public dissection, flagellation, judicial torture, and public punishment. This volume explores such extreme manifestations of early modern bodily obsessions and fascinations and their wider cultural significance. Agreeing that an interest in physical boundaries, extreme physical manifestations, and situations developed and grew stronger during the early modern period, the essays in this volume investigate whether this interest can be traced in a wider range of cultural phenomena and should therefore be given a prominent place in any future characterization of the early modern period. Taken as a whole, the volume can be read as an attempt to create a new context in which to explore the cultural history of the human body as well as the metaphors of research and investigation themselves.

**Medieval and Early Renaissance Medicine** Nancy G. Siraisi, 2009-05-15 Western Europe supported a highly developed and diverse medical community in the late medieval and early Renaissance periods. In her absorbing history of this complex era in medicine, Siraisi explores the inner workings of the medical community and illustrates the connections of medicine to both natural philosophy and technical skills. *The Resounding Soul* Samuel Kimbriel, Eric Austin Lee, 2016-09-29 It is surely not coincidental that the term soul should mean not only the centre of a creature's life and consciousness but also a thing or action characterised by intense vivacity that bikes got soul. It also seems far from coincidental that the same contemporary academic discussions that have largely cast aside the language of soul in their quest to define the character of human mental life should themselves be so bloodless or so lacking in soul. *The Resounding Soul* arises from the opposite premise that the task of understanding human nature is bound up with the more critical task of learning to be fully human. The papers collected here are derived from a conference in Oxford sponsored by the Centre of Theology and Philosophy and explore the often surprising landscape that emerges when human consciousness is approached from this angle. Drawing upon literary, philosophical, theological, historical, and musical modes of analysis, these essays remind the reader of the power of the ancient language of soul over against contemporary impulses to reduce, fragment, and overly determine human selfhood. *Studies of the Northern Campus Martius in Ancient Rome* Robert E. A. Palmer, 1990 This is a print-on-demand edition of a hard-to-find journal. Treats ancient sites and monuments in the northern Campus Martius. For centuries during the Republic, the field of the god Mars lay outside the city of Rome on its northwestern limit. Some political activities and many religious activities

took place there Pompey and Caesar began to alter the aspect of the land with a theater and its great colonnade a hall of assembly and on the edge of the city a new forum with a temple Emp Augustus and his son in law Agrippa quickened the process of urbanization with a building program combined with efforts to bring the Tiber River under control Here is the story of the development of the terrain from the end of the Republic to the onset of church bldg Illus
