Studies In Science:

Science, Democracy, and Curriculum Studies John A. Weaver, 2018-08-30 In this book John A Weaver suggests curriculum studies scholars need to engage more in science matters It offers a review of science studies writing from Ludwick Fleck and Thomas Kuhn to Philip Mirowski The volume includes chapters on the rhetoric of science with a focus on the history of rhetoric and economics then on the rhetoric of models statistics and data a critique of neoliberalism and its impact on science policy and the foundations of democracy Harry Collins and Robert Evans theory of expertise followed by chapters on feminism with a focus on the work of Sharon Traweek Karen Barad and Vinciane Despret postcolonial thought with attention paid to the work of Daniela Bleichmar Londa Schiebinger Judith Carney Sylvia Wynter Paul Gilroy and Sandra Harding and a final chapter on Nietzsche's philosophy of science Each section is introduced by an interlude drawing on autobiographical connections between curriculum studies and science studies

Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2003-09-30 This volume brings together contributions that resemble spotlights thrown on the past twenty five years of science and technology studies It covers a broad range history of science science and politics science and contemporary democracy science and the public science and the constitution science and metaphors and science and modernity and provides a critical overview of how the field of science and technology studies has emerged and developed

Theory and Methods for Sociocultural Research in Science and Engineering Education Gregory J. Kelly, Judith L. Green, 2018-12-17 Introducing original methods for integrating sociocultural and discourse studies into science and engineering education this book provides a much needed framework for how to conduct qualitative research in this field The three dimensions of learning identified in the Next Generation Science Standards NGSS create a need for research methods that examine the sociocultural components of science education With cutting edge studies and examples consistent with the NGSS this book offers comprehensive research methods for integrating discourse and sociocultural practices in science and engineering education and provides key tools for applying this framework for students pre service teachers scholars and researchers

Interdisciplinary Research : Case Studies from Health and Social Science Frank Kessel, Patricia Rosenfield Carnegie Corporation of New York, Norman Anderson American Psychological Association, 2008-03-11 Interdisciplinary research now receives a great deal of attention because of the rich creative contributions it often generates But a host of factors institutional interpersonal and intellectual also make a daunting challenge of conducting research outside one's usual domain This newly updated and revised edition of *Interdisciplinary Research* is a substantive and practical guide to the most effective avenues for collaborative and integrative research in the social behavioral and bio medical sciences It provides answers to questions such as what is the best way to conduct interdisciplinary research on topics related to human health behavior and development Which are the most successful interdisciplinary research programs in these areas How do you identify appropriate collaborators How do you find dedicated funding streams How do you overcome peer review and

publishing challenges This is the only book that provides answers directly from researchers who have carried out successful interdisciplinary programs The editors give a concise account of the lessons that can be taken from the book and then present a series of case studies that reveal the most successful interdisciplinary research programs These programs provide a variety of models of how best to undertake interdisciplinary research Each of the chapter authors has carried out innovative collaborative programs and all give compelling accounts of the benefits of interdisciplinary research and the central strategies required to achieve them

The Third Wave in Science and Technology Studies David S. Caudill, Shannon N. Conley, Michael E. Gorman, Martin Weinel, 2019-05-14 This book analyzes future directions in the study of expertise and experience with the aim of engendering more critical discourse on the general discipline of science and technology studies In 2002 Collins and Evans published an article entitled The Third Wave of Science Studies suggesting that the future of science and technology studies would be to engage in Studies in Expertise and Experience In their view scientific expertise in legal and policy settings should reflect a consensus of formally trained scientists and citizens with experience in the relevant field but not ordinary citizens The Third Wave has garnered attention in journals and in international workshops where scholars delivered papers explicating the theoretical foundations and practical applications of the Third Wave This book arose out of those workshops and is the next step in the popularization of the Third Wave The chapters address the novel concept of interactional experts the use of imitation games appropriating scientific expertise in law and policy settings and recent theoretical developments in the Third Wave

Attitude Research in Science Education Dr. Issa M. Saleh, Dr. Myint Swe Khine, 2011-02-01 The research into how students' attitudes affect their learning of science-related subjects has been one of the core areas of interest by science educators The development in science education records various attempts in measuring attitudes and determining the correlations between behavior, achievements, career aspirations, gender identity, and cultural inclination Some researchers noted that attitudes can be learned and teachers can encourage students to like science subjects through persuasion But some view that attitude is situated in context and has much to do with upbringing and environment The critical role of attitude is well recognized in advancing science education in particular designing curriculum and choosing powerful pedagogies and nurturing students Since Noll's 1935 seminal work on measuring the scientific attitudes, a steady stream of research papers describing the development and validation of scales have appeared in scholarly publications Despite these efforts, the progress in this area has been stagnated by limited understanding of the conception of attitude dimensionality and inability to determine the multitude of variables that make up such concept This book makes an attempt to take stock and critically examine classical views on science attitudes and explore contemporary attempts in measuring science-related attitudes The chapters in this book are a reflection of researchers who work tirelessly in promoting science education and highlight the current trends and future scenarios in attitude measurement
