Studies Voltaire 18th Century Volume 269:

Human Nature, Cultural Diversity, and the French Enlightenment Henry Vyverberg, 1989-08-17 In this work Henry Vyverberg traces the evolution and consequences of a crucial idea in French Enlightenment thought the idea of human nature Human nature was commonly seen as a broadly universal unchanging entity though perhaps modifiable by geographical social and historical factors Enlightenment empiricism suggested a degree of cultural diversity that has often been underestimated in studies of the age Evidence here is drawn from Diderot's celebrated Encyclopedia and from a vast range of writing by such Enlightenment notables as Voltaire Rousseau and d'Holbach Vyverberg explains not only the age's undoubted fascination with uniformity in human nature but also its acknowledgment of significant limitations on that uniformity He shows that although the Enlightenment's historical sense was often blinkered by its notions of a uniform human nature there were also cracks in this concept that developed during the Enlightenment itself

Satanism: A Social History Massimo Introvigne, 2016-08-29 A 17th century French haberdasher invented the Black Mass An 18th century English Cabinet Minister administered the Eucharist to a baboon High ranking Catholic authorities in the 19th century believed that Satan appeared in Masonic lodges in the shape of a crocodile and played the piano there A well known scientist from the 20th century established a cult of the Antichrist and exploded in a laboratory experiment Three Italian girls in 2000 sacrificed a nun to the Devil A Black Metal band honored Satan in Krakow Poland in 2004 by exhibiting on stage 120 decapitated sheep heads Some of these stories as absurd as they might sound were real Others which might appear to be equally well reported are false But even false stories have generated real societal reactions For the first time Massimo Introvigne proposes a general social history of Satanism and anti Satanism from the French Court of Louis XIV to the Satanic scares of the late 20th century satanic themes in Black Metal music the Church of Satan and beyond

The Cambridge History of Literary Criticism: Volume 4, The Eighteenth Century H. B. Nisbet, Claude Rawson, 2005-12-08 This is a comprehensive 1997 account of the history of literary criticism in Britain and Europe between 1660 and 1800 Unlike previous histories it is not just a chronological survey of critical writing but a multidisciplinary investigation of how the understanding of literature and its various genres was transformed at the start of the modern era by developments in philosophy psychology the natural sciences linguistics and other disciplines as well as in society at large In the process modern literary theory at first often implicit in literary texts themselves emancipated itself from classical poetics and rhetoric and literary criticism emerged as a full time professional activity catering for an expanding literate public The volume is international both in coverage and in authorship Extensive bibliographies provide guidance for further specialised study

Rameau and Musical Thought in the Enlightenment Thomas Christensen, 2004-12-16 Ranging widely over the musical and intellectual thought of the eighteenth century Thomas Christensen orients Rameau's accomplishments in the light of contemporaneous traditions of music theory as well as many of the scientific ideas current in the French Enlightenment Rameau is revealed to be an unsuspectedly syncretic and

sophisticated thinker betraying influences ranging from neoplatonic thought and Cartesian mechanistic metaphysics to Locke's empirical psychology and Newtonian experimental science. Additional primary documents and manuscripts many revealed here for the first time help clarify Rameau's fascinating and stormy relationship with the Encyclopedists Diderot, Rousseau and d'Alembert. This book will be of value to all music theorists concerned with the foundations of harmonic tonality and it should also be of interest to scholars of eighteenth century science, the Enlightenment and the general history of ideas.

BOOK JACKET Classical Learning in Britain, France, and the Dutch Republic, 1690-1750 Floris Verhaart, 2020-06-10

For much of western history the achievements of classical antiquity were seen as unsurpassable and works by Latin and Greek authors were viewed as treasure troves of information still useful for contemporary society. By the late seventeenth century however the progress of scientific discoveries and the new paradigms of rationalism and empiricism meant the authority of the ancients was called into question. Those working on the classical past and its literature debated new ways of defending their relevance for society. The different approaches to classical literature defended in these debates explain how the writings of ancient Greece and Rome could become a vital part of eighteenth century culture and political thinking. Floris Verhaart analyses these eighteenth century debates about the value of classics arguing that the Enlightenment though often seen as an age of reason and modernity in fact continuously sought inspiration from preceding traditions and ages such as Renaissance humanism and classical antiquity. The volume offers an interesting parallel with the modern day in which the relationship between experts and the general public has become the topic of debate and many academics especially in the humanities face pressure to explain how their work benefits society at large.
