

## Exam 1 Study Guide

### Chapters 1 & 2

#### CHAPTER 1: Human Inquiry & Science

- I. Introduction
- II. Looking for Reality: Understand differences between ways we can observe reality. These are:
  - A. Knowledge from Agreement Reality:
    1. Before scientists accept the reality of something they haven't personally experienced, an assertion must have both logical & empirical support.
    2. It must make sense & it must not contradict actual observation.
    3. **Agreement Reality** = those things we "know" as part & parcel of the culture we share w/ those around us
    4. **Epistemology** = the science of knowing; systems of knowledge
    5. **Methodology** = (a subfield of epistemology) the science of finding out; procedures for scientific investigation
    6. Both assists & hinders our attempts to find out for ourselves.
  - B. Ordinary Human Inquiry:
    1. People predict their future circumstances using causal & probabilistic reasoning.
    2. Aims at answering both "what" & "why" questions, and we pursue these goals by observing & figuring out.
  - C. Tradition:
    1. We inherit a culture made up, in part, of firmly accepted knowledge about the workings of the world & the values that guide our participation in it.
    2. The things that "everybody knows"
    3. Advantage can be that we don't necessarily have to start from scratch in our search for regularities & understanding.
  - D. Authority:
    1. Acceptance of new acquisitions depends on the status of the discoverer.
    2. Like tradition, authority can both assist & hinder human inquiry.
    3. Inquiry can be greatly hindered by the legitimate authority who errs w/in his/her own special province.
    4. Inquiry is also hindered when we depend on the authority of experts speaking outside their realm of expertise.
  - E. What are some of the Errors in Inquiry & Some Solutions? Understand the following:
    1. Inaccurate Observations: make observation more deliberate
    2. Overgeneralization: seek a sufficiently large sample of observations
