The Laws of History Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature

A Study of History Arnold Toynbee, 1987 Toynbee's analysis of the rise and fall of civilizations has been acknowledged as an achievement without parallel in modern scholarship This abridgement while reducing the work to one sixth of its original size preserves its method atmosphere texture and for the most part the author's very words

Fanaticism Alberto Toscano, 2017-08-01 The idea of fanaticism as a deviant or extreme variant of an already irrational set of religious beliefs is today invoked by the West in order to demonize and psychologize any non liberal politics Alberto Toscano's compelling and erudite counter history explodes this accepted interpretation in exploring the critical role fanaticism played in forming modern politics and the liberal state Tracing its development from the traumatic Peasants War of early sixteenth century Germany to contemporary Islamism Toscano tears apart the sterile opposition of reasonableness and fanaticism Instead in a radical new interpretation he places the fanatic at the very heart of politics arguing that historical and revolutionary transformations require a new understanding of his role Showing how fanaticism results from the failure to formulate an adequate emancipatory politics this illuminating history sheds new light on an idea that continues to dominate debates about faith and secularism
