SimpleNursing

NURSING PROCESS:

The systematic approach used to guide client care.

ADPIE

A

ASSESSMENT

→ Gather info & review history

Objective Data

Observed

Example: physical exam, vital signs, signs & symptoms, labs, etc

Subjective Data → what the client says (reports)

Example: stomach ache, chest pain, headache, nausea, etc)

D

DIAGNOSIS: NURSING DIAGNOSIS

→ Identify problems

Using the assessment data collected, the goal is to address both actual or potential health problems for the client.

It is mainly used to help shape clinical judgment about a client's physical & psychological status, but may also include the client's social factors, family, or community experiences.

Physical needs always come before psychological needs, as outlined by the Maslow's hierarchy of needs.

For example: We are always going to prioritize an airway issue before we treat an emotional one. Just think what is going to kill your client the fastest & that should help guide which nursing diagnosis to place first on your care plans.

Maslow's

EXIT EXAM QUESTION

Q1: Client with pneumonia ... oxygen sat. 89% ... most appropriate nursing diagnosis?

- Impaired gas exchange.

EXIT EXAM QUESTION

Q2: Client with Crohn's disease ... feels overwhelmed & has not had any outside support since her recent divorce. Which nursing diagnoses are best for the plan of care? (Select 2)

- Hopelessness
- Risk of deficient fluid volume
- Ineffective coping
- Imbalanced nutrition

P

PLANNING: PLAN OF CARE

→ Goals, outcomes, & action plan

S

- Specific goals

M

- Measurable goals

A

- Attainable goals

R

- Realistic goals

T

- Timely goals

- Poorly written outcome:
"Client will walk without dizziness."
- SMART outcome:
"Client will demonstrate improved activity tolerance as evidenced by walking 20 feet without dizziness by day 3 of hospitalization."

Develop an action plan with specific goals & desired OUTCOME of the plan & always discuss this plan with the client to assess that perceived needs are being met. Don't forget about the patient's opinion here, but make sure patient's desire is realistic, obviously.

EXIT EXAM QUESTION

... MOST appropriate way to assess if the plan of care correlates with the client's perceived needs?

- Discuss the plan of care with the client

Study Guide To Acc Clinical Nursing Skills

M. Robert deJong

Study Guide To Acc Clinical Nursing Skills:

Study Guide to ACC Clinical Nursing Skills Sandra S. Smith, Donna Duell, 1992 **Clinical Nursing Skills and Techniques - E-Book** Anne G. Perry, Patricia A. Potter, Wendy R.
