Supernova The Exploding Star Of 1987:

Supernova! Donald Goldsmith, 1989 Recounts how the supernova was discovered and discusses the information it is providing scientists about the life cycle of stars *The Supernova Story* Laurence A. Marschall, 2021-02-09 Astronomers believe that a supernova is a massive explosion signaling the death of a star causing a cosmic recycling of the chemical elements and leaving behind a pulsar black hole or nothing at all In an engaging story of the life cycles of stars Laurence Marschall tells how early astronomers identified supernovae and how later scientists came to their current understanding piecing together observations and historical accounts to form a theory which was tested by intensive study of SN 1987A the brightest supernova since 1006 He has revised and updated *The Supernova Story* to include all the latest developments concerning SN 1987A which astronomers still watch for possible aftershocks as well as SN 1993J the spectacular new event in the cosmic laboratory **The Supernova Story** Laurence A. Marschall, 1994-07-03 Astronomers believe that a supernova is a massive explosion signaling the death of a star causing a cosmic recycling of the chemical elements and leaving behind a pulsar black hole or nothing at all In an engaging story of the life cycles of stars Laurence Marschall tells how early astronomers identified supernovae and how later scientists came to their current understanding piecing together observations and historical accounts to form a theory which was tested by intensive study of SN 1987A the brightest supernova since 1006 He has revised and updated *The Supernova Story* to include all the latest developments concerning SN 1987A which astronomers still watch for possible aftershocks as well as SN 1993J the spectacular new event in the cosmic laboratory Mosaic ,1990 Supernovae And Stellar Evolution - Proceedings Of The School And Workshop A Ray, T Velusamy, 1991-05-24 The papers in this volume present a recent survey of important results in the field of supernovae and pulsars The review articles are likely to prove valuable because of their pedagogical nature to students and other entrants in the field For researchers already working in this field observational results and the details of theoretical investigations presented systematically are likely to stimulate further debates regarding classification of supernovae types Ia Ib and II and their progenitors and their relationship New results are presented The Death of a Star ,1989 **Journey to the Stars** Robert Jastrow, 2013-07-24 Robert Jastrow discusses the past and future of space exploration the cosmic mysteries that still await solution and the possibility of extraterrestrials whose intelligence far outstrips our own Annual Report for Fiscal Year ... National Science Foundation (U.S.), National Science Foundation (U.S.), 1987 The Extravagant Universe Robert P. Kirshner, 2016-10-04 *The Extravagant Universe* tells the story of a remarkable adventure of scientific discovery One of the world s leading astronomers Robert Kirshner takes readers inside a lively research team on the quest that led them to an extraordinary cosmological discovery the expansion of the universe is accelerating under the influence of a dark energy that makes space itself expand In addition to sharing the story of this exciting discovery Kirshner also brings the science up to date in a new epilogue He explains how the idea of an accelerating universe once a daring interpretation of sketchy data is

now the standard assumption in cosmology today This measurement of dark energy a quality of space itself that causes cosmic acceleration points to a gaping hole in our understanding of fundamental physics In 1917 Einstein proposed the cosmological constant to explain a static universe When observations proved that the universe was expanding he cast this early form of dark energy aside But recent observations described first hand in this book show that the cosmological constant or something just like it dominates the universe s mass and energy budget and determines its fate and shape Warned by Einstein s blunder and contradicted by the initial results of a competing research team Kirshner and his colleagues were reluctant to accept their own result But convinced by evidence built on their hard earned understanding of exploding stars they announced their conclusion that the universe is accelerating in February 1998 Other lines of inquiry and parallel supernova research now support a new synthesis of a cosmos dominated by dark energy but also containing several forms of dark matter We live in an extravagant universe with a surprising number of essential ingredients the real universe we measure is not the simplest one we could imagine **The Life and Death of Stars** Kenneth R. Lang, 2013-03-25 Explains how stars are born how they evolve and their ultimate fates for a broad general audience
