and forms of supervision The skills informing good supervision What to expect from supervision Key professional issues in supervision Written in a lively and engaging style this book will enable both supervisors and supervisees to get the best they can from the supervisory experience Supervision Of Psychotherapy And Counselling Geraldine Shipton,1997-05-16 What do we really know about the supervision of therapy and counselling What kind of things make it easier and what gets in the way How do therapy and supervision resemble one another and in what ways do they differ In an effort to address these pressing questions this volume brings together authors from a variety of different perspectives and orientations to comment on supervision Although strongly influenced by psychoanalytic ideas the book also offers humanistic insights into good supervision practices It is recommended reading for all experienced therapists and counsellors and will be particularly useful to those undertaking advanced courses on supervision **Supervision Can Be Playful** Athena A. Drewes,Jodi Ann Mullen,2011-08-18 Supervision Can Be Playful offers clinical supervisors of mental health professionals a comprehensive and thoughtful resource The text focuses on the clinical supervision of child and play therapists with supervision interventions that can be augmented for use with mental health professionals who provide supervision to adolescent and adult therapists The perspectives discussed regarding the role of the clinical supervisor are universal and readers will find them relevant regardless of the age group they are working with The text addresses the roles and processes of clinical supervision from a unique playful perspective and from an eclectic theoretical orientation Each chapter author offers a piece of the supervision puzzle and offers the reader clear guidelines for implementing techniques and the rationale behind them *Constructive Clinical Supervision in Counseling and Psychotherapy* Douglas A. Guiffrida,2014-12-17 Constructive Clinical Supervision in Counseling and Psychotherapy articulates a practical theoretical approach to supervision that integrates salient elements of a number of diverse but complementary theoretical perspectives from the fields of human development psychotherapy and clinical supervision to assist in facilitating supervisee growth and change from a constructivist framework This constructive approach to supervision is designed to serve as a practical integrative meta theory for supervisors of any theoretical orientation For readers who already identify with constructivist ideas this book will provide a theoretical grounding for their work along with strategies to deepen their clinical practice For those who are new to constructivist thinking this book offers an innovative possibility for conceptualizing their role as clinical supervisors and alternative interventions to consider during times of impasse *Psychotherapy Supervision* Maria Gilbert,Kenneth Evans,2000-12-16 Maria Gilbert and Ken Evans have given us a beautifully written and richly illustrated account of psychotherapy supervision Providing clear guidelines for effective clinical supervision the book describes and vividly illustrates how the supervisor monitors instructs models consults and supports the supervisee all within the context of respect and empathy Marvin R Goldfried Ph D State University of New York at Stony Brook Stony Brook New York USA Don t read this book if you have a well worked out pre determined model of supervision that you don t want to change it will only disturb distract and challenge you If you would like to review your

model of supervision on the other hand update it in the light of modern scholarship and insights open it to manufactured uncertainty so as to adapt it to the contemporary issues of the day then it s a must for you It s a book of tomorrow in the light of the best of yesterday and indisputably for today Michael Carroll Ph D Chartered Counselling Psychologist and BAC Fellow Gilbert and Evans book is sure to become a key text in the area of psychotherapy supervision from an integrative perspective the authors reveal an extensive knowledge of the work of other experts in the field and a deep understanding of how this knowledge may be translated into practice Gilbert and Evans draw much needed attention to the often neglected aspect of the contexts within which supervision takes place Their focus on the multi cultural aspects of supervision and their advocacy for anti oppressive practices is of note very accessible and highly recommended to beginning supervisees and seasoned supervisors alike This book will make a substantial contribution to the field for a long time to come Gillian Straker Professor of Psychology at the University of Sydney What are the primary goals of clinical supervision What is the basis for ethical decision making in supervision How can anti oppressive practice be embedded in the training of supervisors This book presents an integrative relational model for psychotherapy supervision The focus is on the primacy of the relationship both in psychotherapy and in supervision This is one of the few books in the field of supervision to focus exclusively and in depth on issues in clinical supervision It provides an integrative relational model of supervision drawing on developmental theory that is applicable to the fields of psychotherapy counselling and clinical and counselling psychology The authors believe that this integrative framework for supervision will be of use to supervisors of pure form approaches as well as to those supervisors involved in cross orientation supervision since its main focus is on the quality of the supervisory alliance Psychotherapy Supervision contains a balance of theoretical material examples of in vivo supervision and a discussion of techniques The book presents some interesting and innovative material on ethical decision making and on anti oppressive practice in training organisations The authors illustrate their material with frequent examples of supervision from their own practice to show the reader the model in action The book is aimed at supervisors of counsellors psychotherapists and psychologists at all levels

Supervision Moira Walker, Michael Jacobs, 2006-02-22 Supervision is a prerequisite for all counsellors and for most psychotherapists yet until recently it has been assumed that any experienced counsellor or therapist could become a supervisor without any special expertise But the experience of those in supervision is sometimes of inadequate or even unhelpful work by their supervisors At the same time supervision is receiving considerable attention as a discipline in its own right with an expanding literature on the dynamics of the supervisory couple or the supervisory triad since the client is a central if absent presence more attention is also being paid to the technical skills required of the supervisor This book addresses those issues both from the perspective of the supervisee and the supervisor suggesting what supervisees might expect from good supervision as well as offering guidance to supervisors on how best to use to the full the opportunities offered by a therapeutic situation which has some similarities but also some radical differences from counselling and therapy
