The Superworld I Antonino Zichichi, 2013-03-13 During August 1986 a group of 96 physicists from 61 laboratories in 17 countries met in Erice for the 24th Course of the International School of Subnuclear Physics The countries represented were Austria Bulgaria Belgium Denmark France the Federal Republic of Germany Hungary Israel Italy Poland Portugal South Africa Spain Sweden Switzerland United Kingdom United States of America The School was sponsored by the European Physical Society EPS the Italian Ministry of Education MPI the Sicilian Regional Government ERS and the Weizmann Institute of Science I hope the reader will enjoy this book as much as the students enjoyed attending the lectures and the discussion Sessions which are the most attractive features of the School Thanks to the work of the Scientific Secretaries the discussions have been reproduced as faithfully as possible At various stages of my work I have enjoyed the collaboration of my friends whose contributions have been extremely important for the School and are highly appreciated I thank them most warmly A final acknowledgement to all those who in Erice Bologna Rome and Geneva helped me on so many occasions and to whom I feel very much indebted The Superworld II Antonino Zichichi, 2013-03-13 During A lgust 1987 a group of 76 physicists from 51 laboratories in 22 countries met in Erice for the 25th Course of the International School of Subnuclear Physics The countries represented were Austria Bulgaria Canada Chile China Colombia Czechoslovakia France Federal Republic of Germany Greece Hungary India Italy Lebanon The Netherlands Poland Portugal Spain Sweden Switzerland United Kingdom and the United States of America The School was sponsored by the European Physical Society EPS the Italian Ministry of Public Education MPI the Italian Ministry of Scientific and Technological Research MRSI the Sicilian Regional Government ERS and the Weizmann Institute of Science This is the 25th anniversary of the School and for the second time the programme has been mainly devoted to the Superworld Needless to say that the Superworld appears to be at present very far from the experimental axis Nevertheless the Superworld is a fascinating field of modern physics we ought to know what boils in the heads of our theoretical colleagues keeping in mind that the source of basic truth is and will remain experimental physics Relevant news in experimental physics was scarce in the past year and the most interesting results have been reported The future has also been presented with LEP Gran Sasso HERA projects to become operative by 1000 and ELOISATRON as the driving force for Europe to keep a central role in Subnuclear Physics The Superworld III Antonino Zichichi, 2013-03-13 During August 1988 a group of 67 physicists from 45 laboratories in 17 countries met in Erice for the 26th Course of the International School of Subnuclear Physics The countries represented were Australia Austria Canada China Czechoslovakia Denmark France Federal Republic of Germany India Italy Poland Portugal Spain Sweden Switzerland United Kingdom and the United States of America The School was sponsored by the European Physical Society EPS the Italian Ministry of Public Education MPI the Sicilian Regional Government ERS and the Weizmann Institute of Science The interest in the Superworld is still very high This is why for the third year the Erice School has been devoted to a

great extent to review the many developments in Superstring Supermembranes with their problems of quantization and compactification All these theoretical speculations are very far from the experimental frontier In order to keep our feet on the ground a series of lectures was included to cover the status of CP violation of the Heavy Leptons together with the projects for new physics at Gran Sasso and Fermi Lab For completeness Julian Schwinger reviewed the great problem of Anomalies in Quantum Field Theory and Shelly Glashow gave a closing lecture on the end of Superworld If nothing new happens next year there will be no Superworld in Erice From Superstrings To The Real Superworld - Proceedings Of The International School Of Subnuclear Physics Antonino Zichichi, 1994-06-22 These proceedings cover the most recent advances in these topics keeping in mind their impact on observable phenomena In addition they review the status and prospects of all known gauge forces including the experimental results on their validity The Many Faces of the Superworld Yuri Golfand, Mikhail A. Shifman, 2000 This invaluable volume is dedicated to the memory of Yuri Golfand one of the discoverers of supersymmetry Together with his student he constructed in 1970 the superextension of the Poincar algebra and obtained the first four dimensional supersymmetric field theory a version of supersymmetric QED Golfand died in 1994 in Israel Did the pioneers of supersymmetry Neveu Schwarz Ramond Golfand Volkov Wess Zumino and others foresee in the early 1970 s that they would be opening to us the gates of the superworld The superworld will become one of the most important components of our understanding of Nature a component that will stay with us forever This book is a compilation of the original papers and review articles devoted to various aspects of supersymmetry written by the outstanding researchers in the field theorists whose work shaped the present day theory and continues to make a profound impact on the frontier directions of the current development A wide range of topics is covered from subtle results in the superstring theory to supersymmetry based phenomenology Most of the articles have been prepared specifically for this volume The first part of the book consists of the Editor's essay presenting the basic stages of Golfand's life and work the memoirs of his widow Mrs N Koretz Golfand and of his student Dr E Likhtman Also included is the article of Prof M Marinov Revealing the Path to the Superworld outlining the main ideas that paved the way to the discovery of supersymmetry The historical part of the book concludes with the English translation of the Golfand Likhtman paper on supersymmetry published in 1972 in the Tamm Memorial Volume Recent Advances In The Superworld - Proceedings Of The International Workshop J L Lopez, Dimitri V Nanopoulos, 1994-03-29 The realization that precision LEP data lend support to the idea of supersymmetric grand unification and supersymmetry in general led to the organization of the First HARC International Workshop on Recent Advances in the SuperWorld The idea was to have a workshop that discussed all aspects of the supersymmetric world the SuperWorld as it should be properly known These aspects are so diverse that they are usually studied by high energy physicists with vastly different interests The selection of speakers included the whole spectrum in energy from experimental physicists to specialists in low energy phenomenology supersymmetric grand unification supergravity superstrings and supercosmology
