Supply Side Stewardship:

The Jesus Enterprise Kent R. Hunter, 2004 Those Christians who work in missionary settings among non Christian groups learned an important lesson long ago about communicating the gospel You can build the church ring the bell and hope that folks will find their way to your doorstep Or you can immerse yourself in the culture build relationships and minister to people where they are Needless to say it is the latter route that bears the greatest fruit and the greatest similarity to Jesus own practice of proclaiming the gospel As churches in North America seek to grow and minister more effectively they would do well to remember that they too live in an increasingly non Christian culture The churches that will succeed in reaching out to the unchurched in this society are those who have learned how to encounter such people on their own territory Hence one congregation brings visitors into their building not through something foreign sounding like a narthex but through a coffee and espresso bar In this and dozens of other ways innovative congregations are reaching out to the unchurched Kent Hunter names such forms of ministry the Jesus Enterprise In this helpful book he tells the stories of churches where this kind of outreach has become the norm More important he also provides other churches the tools they need to identify the particular opportunities their context presents and ways to take advantage of those opportunities to present the gospel to those most in need of it

Options for Aged Care in China Elena Glinskaya, Zhanlian Feng, 2018-11-28 China is aging at an unprecedented rate Improvements in life expectancy and the

consequences of the decades old family planning policy have led to a rapid increase in the elderly population According to the United Nations World Population Prospects the proportion of older people age 65 and over will increase by about one fourth by 2030 and the elderly will account for about one quarter of the total population by 2050 Population aging will not only pose challenges for elder care but also have an impact on the economy and all aspects of society World Bank 2016a The government is aware of the need to develop an efficient and sustainable approach to aged care To this end the General Office of the State Council issued the 12th Five Year Plan for the Development of Aged Care Services in China and the Development Plan for a System of Social Services for the Aged 2011 2015 It is now in the process of formulating the 13th Five Year National Plan on Aging which will further elaborate and finalize the reform roadmap for 2016 to 2020 The Plan is expected to be finalized and launched by June 2016 The National Development and Reform Commission NDRC helped draft these plans and is now leading the development of policy measures for the provision of social services for the elderly This volume has been prepared to support the translation of the broad ideas on aged care provision expressed in the 12th and 13th Five Year Plans and other government plans into reality and to help the government tackle the challenges described above It strives to identify a policy framework that fits the Chinese context and can be put in place gradually Specifically it aims to provide an up to date understanding of the evolving aged care landscape in China review international experiences in long term care provision financing and quality assurance and assess their relevance to China s current situation discuss implications of current developments and trends for the future of aged care in China and propose policy options based on available evidence and best practices *The Jossey-Bass Handbook of Nonprofit Leadership and Management* David Renz,Robert D.

Thomas S. Langston,2017-07-05 *Ideologues and Presidents* argues that ideologues have been gaining influence in the modern presidency There were plenty of ideologues in the New Deal but they worked at cross purposes and could not count on the backing of the cagey pragmatist in the Oval Office Three decades later the Johnson White House systematically sought the help of hundreds of liberals in drawing up blueprints for policy changes But when it came time to implement their plans Lyndon Johnson s White House proved to have scant interest in ideological purity By the time of the Reagan Revolution the organizations that supported ideological assaults on government had never been stronger The result was a level of ideological influence unmatched until the George W Bush presidency In Bush s administration not only did anti statist and

social conservatives take up positions of influence throughout the government but the president famously pursued an elective war that had been promoted for a decade by a networked band of ideologues In the Barack Obama presidency although progressive liberals have found their way into niches within the executive branch the real ideological action continues to be Stage Right How did American presidential politics come to be so entangled with ideology and ideologues Ideologues and Presidents helps us move toward an answer to this vital question *The Ecology of Agricultural Landscapes* Stephen K. Hamilton, Julie E. Doll, G. Philip Robertson, 2015-03-03 Evidence has been mounting for some time that intensive row crop agriculture as practiced in developed countries may not be environmentally sustainable with concerns increasingly being raised about climate change implications for water quantity and quality and soil degradation This volume synthesizes two decades of research on the sustainability of temperate row crop ecosystems of the Midwestern United States The overarching hypothesis guiding this work has been that more biologically based management practices could greatly reduce negative impacts while maintaining sufficient productivity to meet demands for food fiber and fuel but that roadblocks to their adoption persist because we lack a comprehensive understanding of their benefits and drawbacks The research behind this book based at the Kellogg Biological Station Michigan State University and conducted under the aegis of the Long term Ecological Research network is structured on a foundation of large scale field experiments that explore alternatives to conventional chemical intensive agriculture Studies have explored the biophysical underpinnings of crop productivity the interactions of crop ecosystems with the hydrology and biodiversity of the broader landscapes in which they lie farmers views about alternative practices economic valuation of ecosystem services and global impacts such as greenhouse gas exchanges with the atmosphere In contrast to most research projects the long term design of this research enables identification of slow or delayed processes of change in response to management regimes and allows examination of responses across a broader range of climatic variability This volume synthesizes this comprehensive inquiry into the ecology of alternative cropping systems identifying future steps needed on the path to sustainability Proceedings of the ...
