Sur La Logique Et La Theorie De La Science:

Sur la logique et la théorie de la science Jean Cavaillès, 1997 Sur la logique et la théorie de la science Jean Cavaillès, 1987 **Doctrines et concepts, 1937-1987** Association des sociétés de philosophie de langue française, 1988

Traité de logique, ou Essai sur la théorie de la science Joseph Duval-Jouve, 1855 **Sur la logique** Jean Cavaillès, 1960 **Sur la logique et la théorie de la science**, 1960 *Les philosophies françaises et la science* Laurent Fedi, Jean-Michel Salanskis, 2001 La philosophie française se réfère constamment la doctrine kantienne de la connaissance Ce recueil de contributions issues de travaux de recherches universitaires s'intéresse percevoir cette influence et donne un nouvel aperçu de la tradition philosophique française de ses sources et de ses tensions *De l'expérience mathématique* Pierre Cassou-Noguès, 2001 Il s'agit de commenter les principaux écrits de Jean Cavaillès et d'explicitier son appareil conceptuel mathématique et philosophique et de montrer la progression d'une réflexion originale qui dans la première moitié du XXe siècle voulait prendre la mesure des avancées et des controverses déterminant les mathématiques modernes **Sur la logique et la théorie de la science** Jean Cavaillès, 1960 *Philosophy, Phenomenology, Sciences* Carlo Ierna, Hanne Jacobs, Filip Mattens, 2011-02-01 The present volume contains many of the papers presented at a four day conference held by the Husserl Archives in Leuven in April 2009 to commemorate the one hundred and fortieth anniversary of Edmund Husserl's birth The conference was organized to facilitate the critical evaluation of Husserl's philosophical project from various perspectives and in light of the current philosophical and scientific climate Still today the characteristic tension between Husserl's concrete and detailed descriptions of consciousness on the one hand and his radical philosophical claim to ultimate truth and certainty in thinking feeling and acting on the other calls for a sustained reflection on the relation between a Husserlian phenomenological philosophy and philosophy in general What can phenomenological reflection contribute to the ongoing discussion of certain perennial philosophical questions and which philosophical problems are raised by a phenomenological philosophy itself In addition to addressing the question of the relation between phenomenology and philosophy in general phenomenology today cannot avoid addressing the nature of its relation to the methods and results of the natural and human sciences In fact for Husserl phenomenology is not just one among many philosophical methods and entirely unrelated to the sciences Rather according to Husserl phenomenology should be a first philosophy and should aim to become the standard for all true science
