Pollack, Mildred Shapley Matthews, 1989 An integrated discussion of the similarities and differences between the atmospheres of various bodies of the solar system including the Earth Surfaces and interiors of planets and satellites. Ed. by A[udouin] Dollfus, 1970 **Treatise on Geophysics**, 2015-04-17 Treatise on Geophysics Second Edition is a comprehensive and in depth study of the physics of the Earth beyond what any geophysics text has provided previously Thoroughly revised and updated it provides fundamental and state of the art discussion of all aspects of geophysics A highlight of the second edition is a new volume on Near Surface Geophysics that discusses the role of geophysics in the exploitation and conservation of natural resources and the assessment of degradation of natural systems by pollution Additional features include new material in the Planets and Moon Mantle Dynamics Core Dynamics Crustal and Lithosphere Dynamics Evolution of the Earth and Geodesy volumes New material is also presented on the uses of Earth gravity measurements This title is essential for professionals researchers professors and advanced undergraduate and graduate students in the fields of Geophysics and Earth system science Comprehensive and detailed coverage of all aspects of geophysics Fundamental and state of the art discussions of all research topics Integration of topics into a coherent whole Planetary Cartography in the Next Decade (1984-1994) United States. National Aeronautics and Space Administration. Planetary Cartography Working Group, 1984 The cartographic products required to support science and planetary exploration during the next 10 years were assessed Only major map series or first order maps needed to characterize the surface physiography of a planet or satellite were considered Included in these considerations are maps needed as bases for plotting geologic geophysical and atmospheric phenomena and for planning future planetary exploration These products consist of three types of maps controlled photomosaics shaded relief maps and topographic contour maps *Treatise on Geophysics, Volume 10* Tilman Spohn, 2010-05-20 Planets and Moons covers topics relating to the physics of the major planetary bodies in the solar system starting with an introductory description of the solar system and collection of pertinent data continuing with a discussion of the early history of the planets and finishing with articles about planet dynamics thermal evolution of planets and satellites and descriptions of their magnetic fields and the processes that generate them In addition to providing a review on the solid planets and the satellites this volume addresses the interactions of solid surfaces and atmospheres as well as the roles of water and ice in shaping the surfaces of planetary bodies Self contained volume starts with an overview of the subject then explores each topic with in depth detail Extensive reference lists and cross references with other volumes to facilitate further research Full color figures and tables support the text and aid in understanding Content suited for both the expert and non expert *Encyclopedia of Geomagnetism and Paleomagnetism* David

Gubbins, Emilio Herrero-Bervera, 2007-07-19 Understanding the process underlying the origin of Earth magnetic field is one of the greatest challenges left to classical Physics Geomagnetism being the oldest Earth science studies the Earth's magnetic field in its broadest sense The magnetic record left in rocks is studied in Paleomagnetism Both fields have applications pure and applied in navigation in the search for minerals and hydrocarbons in dating rock sequences and in unraveling past geologic movements such as plate motions they have contributed to a better understanding of the Earth Consisting of more than 300 articles written by ca 200 leading experts this authoritative reference encompasses the entire fields of Geomagnetism and Paleomagnetism in a single volume It describes in fine detail at an assessable level the state of the current knowledge and provides an up to date synthesis of the most basic concepts As such it will be an indispensable working tool not only for geophysicists and geophysics students but also for geologists physicists atmospheric and environmental scientists and engineers **Geophysical Journal of the Royal Astronomical Society**, 1971 Vols 11 and 13 includes the Proceedings of the 2nd 3rd International Symposium on Geophysical Theory and Computers Rehovoth Israel etc 1965 66 *Discovering the Solar System* Barrie W. Jones, 2007-07-16 *Discovering the Solar System* Second Edition covers the Sun the planets their satellites and the host of smaller bodies that orbit the Sun This book offers a comprehensive introduction to the subject for science students and examines the discovery investigation and modelling of these bodies Following a thematic approach chapters cover interiors surfaces and the atmospheres of major bodies including the Earth The book starts with an overview of the Solar System and its origin and then takes a look at small bodies such as asteroids comets and meteorites Carefully balancing breadth of coverage with depth *Discovering the Solar System* Second Edition Offers a comprehensive introduction assuming little prior knowledge Includes full coverage of each planet as well as the moon Europa and Titan The Second Edition includes new material on exoplanetary systems and a general update throughout Presents latest results from the Mars Rover and Cassini Huygens missions Includes a colour plate section Contains stop and think questions embedded in the text to aid understanding along with questions at the end of major sections Answers are provided at the end of the book Provides summaries at the end of each chapter and a glossary at the end of the book Praise for the First Edition essential reading for all undergraduate students and for those at a more advanced level approaching the subject for the first time THE SCIENCE BOOK BOARD BOOK REVIEW One of the best books on the solar system I have seen The general accuracy and quality of the content is excellent JOURNAL OF THE BRITISH ASTRONOMICAL ASSOCIATION
