Surgical Strike:

Surgical Strike Jerry Ahern, India and the Sovereignty Principle Rudra Chaudhuri, Nabarun Roy, 2025-09-26 This book offers a comprehensive analysis of India's evolving relationship with sovereignty in a complex global order. Moving beyond conventional narratives, it examines how the sovereignty principle shapes India's behavior across four critical domains: from traditional military power to contemporary data governance. Since gaining independence in 1947, India has positioned itself as a fierce defender of sovereignty on the world stage. From its pioneering advocacy of non-alignment during the Cold War to its reputation for diplomatic resistance against great power pressures, India's commitment to this principle has been a defining feature of its foreign policy. Yet, as this incisive volume reveals, India's interpretation and application of sovereignty has undergone significant transformation over time. Through meticulous analysis of India's military interventions in neighbouring states, its evolving stance on bilateral investment treaties, the complex hydro-politics of India-China relations, and its emerging positions on data sovereignty and technology governance, this study provides a nuanced understanding of when, why, and how India's commitment to sovereignty principles shifts across different contexts. This volume is essential reading for scholars and graduate students of International Relations, South Asian Studies, and Global Politics. It will also appeal to policymakers, diplomats, and professionals engaged in international law, security studies, and global governance who seek deeper insights into India's strategic positioning in world affairs. The chapters in this book were originally published as a special issue of *India Review*. **Special Warfare**, 2015. **INDIA'S MAJOR MILITARY & RESCUE OPERATIONS** Dr. Hemant Kumar Pandey & Manish Raj Singh, 2017-08-01. Nothing provided. Nuclear Weapons and Deterrence Stability in South Asia Devin T. Hagerty, 2019-06-22. This book examines the theory and practice of nuclear deterrence between India and Pakistan, two highly antagonistic South Asian neighbors who recently moved into their third decade of overt nuclear weaponization. It assesses the stability of Indo-Pakistani nuclear deterrence and argues that while deterrence dampens the likelihood of escalation to conventional and possibly nuclear war, the chronically embittered relations between New Delhi and Islamabad mean that deterrence failure resulting in major warfare cannot be ruled out. Through an empirical examination of the effects of nuclear weapons during five crises between India and Pakistan since 1998, as well as a discussion of the theoretical logic of Indo-Pakistani nuclear deterrence, the book offers suggestions for enhancing deterrence stability between these two countries. **Hard Realities: India, Pakistan, China in an Emerging New World** Dr. Amarjit Singh, 2019-12-26. *Hard Realities* presents ideology and strategies for Indian pre-eminence. Some of the interesting takeaways are: Irrefutably, Pakistan's existence is not in India's interest. The time is ripe for dismantling Pakistan as India's neighbor. Thus, Baluchistan, Sindh, West Punjab, and Kashmir must spin out of Pakistan in different ways, while the Federally Administered Tribal Areas (FATA) must be legitimately returned to Afghanistan. Consequently, India has no choice but to prepare its forces with a sense of urgency for the upcoming world economic disruption in the 2020s. However, India has

shortcomings such as historical failures by the Indian leaders to strategize properly with respect to Pakistan and China deficient investment in engineering disciplines and failure to boost its economy timely through indigenous defense production Mostly India s personality is inappreciable Moreover India s approach to China must be unambiguous that Tibet and Xinjiang are not a part of China As such India will not share a border with China But at present China is running circles around India and only technological development of high quality engineering talent will help India India has a majorly tough row to hoe as a nation Its 2 5 to 3 front war is its own creation Though the destiny of nations is a potent force India must not be found wanting when it comes to singly defending its military and economic independence

Changing Patterns of Warfare between India and Pakistan Rizwana Abbasi, Muhammad Saeed Uzzaman, 2023-05-12 *Changing Patterns of Warfare between India and Pakistan* analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan Advanced nuclear technologies such as nuclear submarines aircraft carriers ballistic missile defence systems BMDs multiple independently targetable re entry vehicles MIRVs anti satellite weapons ASAT and disruptive technologies such as hypersonic weapons artificial intelligence AI lethal autonomous weapons LAWs unmanned aerial vehicles UAVs drones and space based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region Further the employment of India s compellence strategy is an indication of a change in its stance that demonstrates smart surgical strikes are now more likely The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct indirect military control and hence challenge the existing status quo and deterrence stability Against this backdrop the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan This book will be of interest to all those researching and working in the fields of security studies strategic studies nuclear policy deterrence thinking and proliferation non proliferation aspects of the nuclear weapons programme within South Asia and beyond It will also be relevant for the academic community policy makers diplomats members of international non governmental organizations INGOs professional research institutes and organizations working on India Pakistan relations
