

## "Algebraic Perfect Squares"

Some quadratic expressions are known as **"perfect squares"** because they can be factored into the form  $(a + b)^2$ .

$$x^2 + 4x + 4 = (x + 2)^2$$

$$x^2 + 10x + 25 = (x + 5)^2$$

$$x^2 - 20x + 100 = (x - 10)^2$$

What do you notice about the following expression:  $x^2 + 12x + 36$ ?

$$x^2 + 12x + 36 = (x + 6)^2$$

Teaching the Next Generation of Teachers Rich Waters, 2016-09-23 Teaching the Next Generation of Teachers looks to serve the many teachers who teach or sponsor classes clubs or conferences for secondary school students who aspire to become teachers Based on the author's research with students in the Tomorrow's Teachers program the book's development is rich with the voices of students and their reflections on how teachers sometimes inspired them to teach and sometimes impelled them to think of new ways to teach Their personal stories as learners will validate all students' experiences as it both invites and inspires aspiring teachers in secondary schools to fulfill their dreams by becoming teachers Guided by the learning community concept it presents research and practical activities that will assist teachers and their students in re-imagining and re-inventing what teachers and schools do It does this as it presents important research on how professional learning communities have the most positive effects on student learning while also empowering teachers to greater job satisfaction Most importantly this book will serve as a practical how-to guide so secondary school students can begin to experience working in a professional learning community as they strive to improve the schools they are in right now In doing this the book adheres to the idea that student leadership now is the best preparation for teacher leadership later It will help aspiring teachers move away from the many stale traditions in schooling as they re-conceive of the profession in ways that will make it more personally satisfying while acknowledging that the work of teachers in the 21st century must necessarily be different from what we have now legacy practices of standardization left over from the industrial age
