**History: Problems and Perspectives** Alain Bernard, Christine Proust, 2013-12-13 This book examines the textual social cultural practical and institutional environments to which the expression teaching and learning contexts refers It reflects on the extent to which studying such environments helps us to better understand ancient or modern sources and how notions of teaching and learning are to be understood Tackling two problems the first is that of certain sources of scientific knowledge being studied without taking into account the various contexts of transmission that gave this knowledge a long lasting meaning The second is that other sources are related to teaching and learning activities but without being too precise and demonstrative about the existence and nature of this teaching context In other words this book makes clear what is meant by context and highlights the complexity of the practice hidden by the words teaching and learning Divided into three parts the book makes accessible teaching and learning situations presents comparatist approaches and emphasizes the notion of teaching as projects embedded in coherent treatises or productions
