**Alternative Schooling and Student Engagement** Nina Bascia, Esther Sokolov Fine, Malcolm Levin, 2017-08-14 This book explores the unique phenomenon of public alternative schools in Toronto Canada and other large urban areas Although schools of this kind have existed for more than a century very little has been written about the alternative school movement These alternatives focus more on child centered instruction give many students and teachers opportunities to organize the school differently provide a greater voice for teachers students and parents and engage students far more with experiential learning When traditional school structures are failing to meet the needs of many children and youth there is a rapidly growing need for information and discussion about alternatives that will encourage their talents and serve their needs This book draws attention to the issue of alternative schooling to help make it more accessible to a wider audience

**Controversy in Science Museums** Erminia Pedretti, Ana Maria Navas Iannini, 2020-04-30 Controversy in Science Museums focuses on exhibitions that approach sensitive or controversial topics With a keen sense of past and current practices Pedretti and Navas Iannini examine and re imagine how museums and science centres can create exhibitions that embrace criticality and visitor agency Drawing on international case studies and voices from visitors and museum professionals as well as theoretical insights about scientific literacy and science communication the authors explore the textured notion of controversy and the challenges and opportunities practitioners may encounter as they plan for and develop controversial science exhibitions They assert that science museums can no longer serve as mere repositories for objects or sites for transmitting facts but that they should also become spaces for conversations that are inclusive critical and socially responsible Controversy in Science Museums provides an invaluable resource for museum professionals who are interested in creating and hosting controversial exhibitions and for scholars and students working in the fields of museum studies science communication and social studies of science Anyone wishing to engage in an examination and critique of the changing roles of science museums will find this book relevant timely and thought provoking

**Back to the Future** Maria Assunção Flores, Ana Amélia Carvalho, Fernando Ilídio Ferreira, Maria Teresa Vilaça, 2013-06-13 Schools and teachers are facing various challenges in a rapidly changing world In such circumstances discussing and sharing concerns of mutual interest regarding policy practice and research is crucial to creating more sophisticated understandings of the various challenges as a first step in the improvement of education While the future should not be imprisoned in the past the past does provide valuable lessons that will undergo new iterations in constructing the future The future will be multi faceted and complex and the different chapters included in this book are intended to provide important contributions from which to build

the future of education The different chapters provide readers with international perspectives frameworks and empirical evidence of legacies continuities and changes in educational policy practice and research in teaching teacher education and learning We hope that they inspire the readers to build the future and to change their own professional realities Cheryl J Craig Ph D Professor University of Houston Houston TX USA Secretary ISATT This book metaphorically captures the looking backward to the past pressing forward to the future that typically takes place on celebratory occasions It causes us to pause and remember even as we race toward a time unknown to us In a sense the authors featured in this book serve as tour guides pointing out legacies continuities and changes in teaching and teacher education I strongly urge readers not only to peruse the chapters that follow but to distill them to their essences and to glean what is of value to be learned from them In conclusion the ISATT Executive especially thanks the co editors of this volume who have compiled a superb collection of chapters on a timely and relevant topic

Beyond Cartesian Dualism Steve Alsop,2006-02-15 There is surprisingly little known about affect in science education Despite periodic forays into monitoring students attitudes toward science the effect of affect is too often overlooked Beyond Cartesian Dualism gathers together contemporary theorizing in this axiomatic area In fourteen chapters senior scholars of international standing use their knowledge of the literature and empirical data to model the relationship between cognition and affect in science education Their revealing discussions are grounded in a broad range of educational contexts including school classrooms universities science centres travelling exhibits and refugee camps and explore an array of far reaching questions What is known about science teachers and students emotions How do emotions mediate and moderate instruction How might science education promote psychological resilience How might educators engage affect as a way of challenging existing inequalities and practices This book will be an invaluable resource for anybody interested in science education research and more generally in research on teaching learning and affect It offers educators and researchers a challenge to recognize the mutually constitutive nature of cognition and affect

Creating a Classroom Community of Young Scientists Jeffrey W. Bloom,2006-07-20 Creating a Classroom Community of Young Scientists

helps teachers both pre service and in service to develop exciting science programs in their classrooms This book provides the groundwork for designing and implementing a science program that takes into account the latest research in teaching and learning It provides an approach that will capture children s imaginations stimulate their curiosity and create a strong foundation for their continued interest in and appreciation of science and the world in which they live The book is designed to be user friendly and offers an approach to teaching science that is exciting for teachers as well This thoroughly revised second edition focuses on making inquiry more explicit both in terms of the process of inquiry and teaching in ways that capitalize on children s curiosity and questions New material has also been added on U S and Canadian science standards as well as professional standards for teachers

**Dominant Discourses in Higher Education** Ian M. Kinchin, Karen

Gravett, 2022-01-13 This book examines the dominant discourses in higher education From the moment teachers enter higher education they are met with dominant discourses that are often adopted uncritically including concepts such as teaching excellence student voice and student engagement Teachers are also met with simplistic binaries such as teaching vs research quantitative vs qualitative research and constructivists vs positivists Kinchin and Gravett suggest that this may present a distorted view contributing to the disconnect between the aims and observable practice of higher education Rather than celebrating difference dominant discourses tend to seek similarities in an attempt to simplify and manage the environment In this book the authors share their belief that teaching and learning should be a thoughtful endeavour Thinking with a breadth of theories the authors explore the overlaps between different perspectives in order to offer a richer and more inclusive interrogation of the dominant discourses that pervade higher education Offering methodological approaches to explore these perspectives the authors bring together academics working in different parts of the university and examine the concept of a rich cartography considering how this can offer meaning within higher education research and practice Becoming Literate in Mathematics and Science , 2001

*Cultural Studies and Environmentalism* Deborah J. Tippins, Michael P.

Mueller, Michiel van Eijck, Jennifer D Adams, 2010-08-05 As the first book to explore the confluence of three emerging yet critical fields of study this work sets an exacting standard The editors aim was to produce the most authoritative guide for ecojustice place based education and indigenous knowledge in education Aimed at a wide audience that includes but is not restricted to science educators and policymakers *Cultural Studies and Environmentalism* starts from the premise that schooling is a small part of the larger educational domain in which we live and learn Informed by this overarching notion the book opens up ways in which home grown talents narratives and knowledge can be developed and eco region awareness and global relationships can be facilitated Incorporating a diversity of perspectives that include photography poetry and visual art the work provides a nuanced lens for evaluating educational problems and community conditions while protecting and conserving the most threatened and vulnerable narratives Editors and contributors share the view that the impending loss of these narratives should be discussed much more widely than is currently the case and that both teachers and children can

take on some of the responsibility for their preservation The relevance of ecojustice to this process is clear Ecojustice philosophy is a way of learning about how we frame or perceive the world around us and why that matters Although it is not synonymous with social or environmental justice the priorities of ecojustice span the globe in the same way It incorporates a deep recognition of the appropriateness and significance of learning from place based experiences and indigenous knowledge systems rather than depending on some urgent ecological crises to advocate for school and societal change With a multiplicity of diverse voices coming together to explore its key themes this book is an important starting point for educators in many arenas It brings into better focus a vital role for the Earth's ecosystems in the context of ecosociocultural theory and participatory democracy alike Encompassing theoretical empirical and experiential standpoints concerning place based knowledge systems this unique book argues for a transformation of science education's intellectual tradition of thinking that emphasizes individual cognition In its place the book offers a wisdom tradition of thinking living and being that emphasizes community survival in harmony within itself and with Mother Earth Glen Aikenhead *Simulations and Student Learning* Matthew Schnurr, Anna MacLeod, 2020-12-07 Simulation based education SBE is a teaching strategy in which students adopt a character as part of the learning process SBE has become a fixture in the university classroom based on its ability to stimulate student interest and deepen analytical thinking *Simulations and Student Learning* is the first piece of scholarship that brings together experts from the social natural and health sciences in order to open up new opportunities for learning about different strategies methods and practices of immersive learning This collection advances current scholarly thinking by integrating insights from across a range of disciplines on how to effectively design execute and evaluate simulations leading to a deeper understanding of how SBE can be used to cultivate skills and capabilities that students need to achieve success after graduation **Teaching for Deep Understanding** Kenneth Leithwood, Pat McAdie, Nina Bascia, Anne Rodrigue, 2006-04-28 This well researched resource draws on the collaborative work between researchers and school practitioners to offer teaching strategies that promote deep understanding and higher order thinking in students

Learning Science Teaching: Developing A Professional Knowledge Base Bishop, Keith, Denley, Paul, 2007-11-01 The book argues that highly accomplished science teachers are also continually learning science teachers It stresses the importance of learning through others by participation in communities of science practitioners as well as individual learning through classroom research *Ethics in the Science and Technology Classroom*, 2010-01-01 This edited book on ethics represents the outcomes of an international collaborative project that examined the role and place of bioethics in science and technology curricula As science and technology advance ethical issues increasingly are brought to the fore not only both for scientists and technologists but also for the general public Science and technology education also reflects this shift and thinking and teaching about ethics in the school curriculum has increased A greater emphasis is being placed on society's general scientific and technological literacy and this includes an understanding of socio scientific issues including ethical decision

making Although this book has a focus on ethics in the school science and technology curriculum we believe it will also prove useful for those thinking about ethical decision making in a range of contexts outside of the school sector The book will prove useful for University lecturers teachers curriculum developers and policy makers and those that are involved in science and technology decision making more broadly International perspectives in social justice programs at the institutional and community levels Enakshi Sengupta,Patrick Blessinger,2021-04-09 Universities and faculty members play a vital role in providing education that helps build a strong foundation for a society where people get equal opportunities for upward social mobility This book addresses the role of education in overcoming poverty and oppression by imparting social justice education at the institution and community level *Your understanding and attitudes to science* The Open University,2011-11-07 This 3 hour free course explored our understanding of and attitudes to science and looked at how to support young children s scientific learning ENC Focus ,2000

## Enjoying the Track of Expression: An Emotional Symphony within **Teaching And Learning Science Towards A Personalized Approach**

In a world eaten by displays and the ceaseless chatter of quick interaction, the melodic beauty and mental symphony produced by the written word frequently disappear into the backdrop, eclipsed by the relentless noise and disruptions that permeate our lives.
