Gordon, 2012-10-12 The story of life in inner city America and the education of its people is often recounted as a tragedy the ending is often predictable and usually dire highlighting deficiency failure and negative trends As with most social problems children and youth in the inner cities are hit hardest But this dismal view is only half of the full picture The cities of our nation are a startling juxtaposition between the despairing and the hopeful between disorganization and restorative potential Alongside the poverty and unemployment the street fights and drug deals are a wealth of cultural economic educational and social resources Often ignored are the resilience and the ability for adaptation which help many who are seemingly confined by circumstance to struggle and succeed in the face of the odds This book helps to broaden the utilization of ways to magnify the circumstances known to enhance development and education so that the burden of adversity is reduced and opportunities are advanced for all children and youth especially the children and youth of the inner cities who are in at risk circumstances The focus is on raising consciousness about the opportunities available to foster resilience among children families and communities and synthesizing the knowledge base that is central to implementing improvements which serve to better the circumstances and educational opportunities of children and families This volume is intended for a wide audience of readers
