School Music Teaching: Its Theory and Practice Lloyd Frederick Sunderman, 1965 **Becoming a Music Teacher** Donald L. Hamann, Shelly Cooper, 2015-12-04 New music teachers often struggle to find a way to connect the content learned in college classes with the content that will be taught in the classroom since the nature of their work demands a high level of both musical and educational ability while also the skills to switch from tuning an orchestra to leading a marching band or practicing voice parts with a chorus **Becoming a Music Teacher Student to Practitioner** focuses on making the connections between the college music classroom and public school music classroom transparent visible and relevant Award winning music educators Donald L Hamann and Shelly Cooper have created a versatile text for music teacher education and one that will provide a significant resource for music education students across the US Based around an innovative organization and approach **Becoming a Music Teacher** is made up of 40 short modules that focus on increasing a teacher's comfort and confidence level when instructing or leading groups Each module is broken down into four individual components that demonstrate real life transfers from classes to classroom through the components of Personal Awareness Personal Musicianship Pre Conducting and Professional Knowledge The Personal Awareness component gives a lesson on good teaching skills by focusing on body awareness body language and communication styles rather than abstract theories of education Personal Musicianship provides a guided learning approach to teaching sight singing and opportunities to create both vocal and instrumental accompaniments with the songs that are included in the modules Pre conducting discusses ways in which certain gestures or concepts could be used in rehearsing a school ensemble through the development of hand arm independence posture and gestures Professional knowledge links the module to the real world and places it in the context of the workplace offering advice on how to work with other teachers and administrators and includes characteristics of successful teachers the role of schools in contemporary society and diverse learners When taken together these components help the student develop a genuinely rounded skill set for the classroom The lessons are activity based and interactive allowing readers to experiment communicate and provide feedback The modules are also flexible and have been designed to be easily integrated into a music education classroom and applied to specific age groups including adult learners a demographic many music education students encounter but one rarely discussed in music education classrooms Each module stands alone allowing instructors to customize their lesson plans by selecting or highlighting the modules most relevant to their class This text also includes exercises that promote reflection on professionalism collegiality and legal factors that affect both students and teachers not found in most education texts **School Music Handbook** Hannah Matthews Cundiff, 1923 High School Music Teaching for Superintendents, Music Supervisors, Grade and High School Teachers Thaddeus Philander Giddings, Earl L. Baker, 1922 Case Studies in Music Education Frank Abrahams, Paul D. Head, 2005 This book is about making the journey as a music teacher about the critical real world problems and conflicts music teachers

face that rarely seem to get any notice in college or graduate school music courses How should a music teacher balance learning and performing What is the best way to handle an angry parent What are the consequences of the grades teachers assign What are the best ways to discipline students How should teachers relate to the administrators and to other teachers What if the school is breaking copyright laws These are just a few of the issues covered in this book The emphasis here is not on the solution but on the process There are many viable approaches to nearly every obstacle but before any meaningful long term solutions can be made teachers must identify their own personal philosophy of music education and recognize those traits that are admirable in another's style This book is one that will engage you and help you become a more effective music teacher

Urban Music Education Kate Fitzpatrick-Harnish, 2015

The prevailing discourse surrounding urban music education suggests the deficit-laden notion that urban school settings are less than rather than different than their counterparts. Through the lens of contextually specific teaching, this book provides a counternarrative on urban music education that encourages urban music teachers to focus on the strengths of their students as their primary resource. Through a combination of research-based strategies and practical suggestions from the author's own experience teaching music in urban settings, the book highlights important issues for teachers to consider such as culturally relevant pedagogy, the opportunity gap, race, ethnicity, socioeconomic status, musical content, curricular change, music program development, student motivation, and strategies for finding inspiration and support. Throughout the book, the stories of five highly successful urban music teachers are highlighted, providing practical, real-world advice for music teachers across the domains of general, choral, band, and string music teaching. Recognizing that the term urban can encompass a wide variety of different school and community settings, this book challenges all teachers who work in under-served and under-resourced settings to take a critical look at their own music classroom and work to tailor their pedagogy to meet the particular needs of their students.
