**Tornado Boys** Ian Hall,2016-08-05 The RAF veteran and author of Fast Jets and Other Beasts shares stories from the men and women who have flown the combat aircraft With the introduction of female pilots to the RAF in 1994 the Tornado was the first aircraft to be flown by both men and women Another aspect distinguishing this book from the rest of the series is that it covers an aircraft which is still in active service especially as a key player in current Middle East operations With focus on the GR1 GR4 versions of the Tornado readers will get to see what it is like to operate this bomber reconnaissance aircraft against the backdrop of modern day scenarios The book begins in the 1970s with stories from operators and ground crew using the Tornado as a Cold War nuclear deterrent and continues with tales of later hot wars as in both Gulf conflicts and in Kosovo There are also stories of Scud hunting in Iraq and Red Flag exercises in the United States as well as of a stunning competition victory over the USAF s Strategic Air Command in their own backyard The short lived anti shipping role is not neglected With the transformation of the Tornado to the GR4 standard the book continues with chapters covering active

service supporting Britain's increasingly complex international commitments and the employment of new weaponry and sensors. All in all, through the eyes of men and women who have operated this extraordinary aircraft, the volume presents an entertaining and illuminating series of tales and anecdotes. These light and informative stories come from those who were proud to serve on and loved to operate the impressively versatile Tornado.

**Phantom Boys** Richard Pike, 2015-07-19 A cracking read on the twin-engined supersonic long-range fighter-bomber from the bestselling author of the *Hunter Boys* and *Lightning Boys* volumes. Britain at War Originally developed for the US Navy, the McDonnell Douglas F-4 fighter-bomber first flew in the spring of 1958. It then entered service for the US Navy in 1961 and in 1969 with the Fleet Air Arm and RAF in the UK. Regarded as one of the most versatile fighters ever built, the Phantom F-4 was the US Navy's fastest and highest-flying aircraft. It was flown by both US military demonstration teams, Navy Blue Angels and the Air Force Thundercats, from 1969 to 1973. It ended its service in 1991 with the RAF. But it continues to serve a variety of air forces across the world, with some still in service fifty years after its first flight. Throughout the twenty chapters of this book, thirteen contributors will take readers across the world with adventures in the Falkland Islands, the United States of America, the United Kingdom, the Far East, and Germany. There are anecdotes of reconnaissance missions, encounters with the Russian Tupolevs, record-breaking flights, and life on HMS Ark Royal. The scope, flair, and pace of the writing in this book will appeal to the general reader as well as to the enthusiast.

*Through Adversity* Alastair Goodrum, 2020-01-15 The stories of three individual careers combine seamlessly to tell the dramatic story of the RAF from the era of biplanes and into the jet age of the Cold War.

**Rate of Climb** Rick Peacock-Edwards, 2020-10-31 A veteran RAF fighter pilot reflects on his service in the sky during the Cold War, the Gulf War, and more in this exciting memoir. Rick Peacock-Edwards has led different lives at different times, but through it all, he has consistently enjoyed himself. One of three sons of outstanding South African Battle of Britain pilot F.O.S.R. Teddy Peacock-Edwards, Rick has a compassionate regard for a generation of wartime aircrew. As the proud son of one of the Few, their selfless daring has inspired me throughout my life. Importantly, they influenced my decision to become an airman in the Royal Air Force, to become a fighter pilot like my father, and to live life with spirit as they had lived their lives. It is essential that their experiences live on. *Rate of Climb*, his original and entertaining biography, drawing on previously unpublished family and archival material, shows Rick in complete command of his primary subject, flying. A leading ex-RAF fighter pilot to his fingertips, he flew the Lightning, Phantom, Tornado, F2, 3, and other high-performance aircraft and served in senior ranking positions in the UK, Germany, and the US. During a varied and distinguished career, he was closely associated with the Eurofighter Typhoon programme and was appointed as the Royal Air Force Inspector of Flight Safety. He ably demonstrated his uncommon skill and determined leadership during the Cold War era, first Gulf War, and elsewhere. A past master of The Honourable Company of Air Pilots, he is a Fellow of the Royal Aeronautical Society and the immediate past vice chairman of the Royal Air Force Club in London. He is equally as engaged in his post-RAF career as he was when a serving officer. This is

an action packed account of a foremost flyer's life with endless good stories and a colourful cast of characters to match Rick's compelling recollections in *Rate of Climb* reveal a life of considerable achievement in a very personal book capturing the ties of airmanship that the author has been privileged to share. A must for all lovers of derring-do in the air. *LIFE*, 1942-12-07

During a seven year period 500 airfields were constructed to serve the needs first of the RAF and later the USAAF as they carried the war to German occupied Europe. The airfields that were constructed took many different forms from training airfields and Advanced Landing Grounds to grass fighter airstrips and vast complexes used to accommodate heavy bombers. This book charts the history of each Second World War airfield in and around the UK providing a unique insight into the construction, operational life and post war history of each airfield. Alongside detailing the history of each airfield this work comprehensively records the details of each unit that operated from airfields around the UK. The information provided in this meticulously researched book is supported by a wealth of 690 photographs providing an illustration into the life of each wartime station. **The Cumulative Book Index**, 1996 A world list of books in the English language. [Panavia Tornado](#) Andy Evans, 1999 The variable geometry Panavia Tornado is the result of a tri-national development programme between Britain, Germany and Italy and has seen service during the Gulf War and the conflict over the Balkans. This volume tells the full story of the Tornado which details the background and politics that led to the formation of Panavia, the development and testing of the aeroplane and its subsequent service life in a variety of roles with its European and Saudi Arabian operators.
