Team Of The Century:

New Century, New Team Bill Nowlin, 2013-12 The team now known as the Boston Red Sox played its first season in 1901. The city of Boston had a well established National League team known at the time as the Beaneaters but the founders of the American League knew that Boston was a strong baseball market and when they launched the league as a new major league in 1901 they went head to head with the N L in Chicago Philadelphia and Boston. Chicago won the American League pennant and Boston finished second just four games behind. The Boston Americans played in a new ballpark the Huntington Avenue Grounds literally on the other side of the railroad tracks from the Beaneaters and they out drew the Beaneaters by more than 2 to 1 in part because they had enticed some of the more popular players player manager Jimmy Collins pitcher Cy Young and slugger Buck Freeman. This volume represents the collective work of more than 25 members of SABR the Society for American Baseball Research. It offers individual biographies of the players team owner Charles Somers league founder Ban Johnson and two of the team's most noted fans Hi Hi Dixwell and Nuf Ced McGreevy. There is also a biography of the Huntington Avenue Grounds ballpark and a study of media coverage of Boston baseball in 1901 and a timeline running from the first spring training through that year's postseason games. Includes written contributions by the following SABR members: Bill Nowlin, Fred Schuld, Joe Santry and Cindy Thomson, Ron Selter, Donna L Halper, Charlie Bevis, Steve Krah, Charles Faber, Dennis Auger, Jim Elfers, Eric Enders, Jack Morris, Paul Wendt, Frank Vaccaro, Rory Costello, Mike Lackey, Dan Desrochers, David Forrester, Tom Simon, David Southwick, Joanne Hulbert, Pete Nash, Dan Fields. Project Management in the 21st Century Gregory Usher, 2021-07-02 This is a different kind of book on project management. Using a narrative tone, humor, and personal anecdotes, the author highlights the significant gaps in current project management theory as well as disparities within project management practice. This book then provides managers with new models for project management and value creation using chaos and complexity theories, systems thinking, and quantum mechanics to explore a more holistic view of project management. Drawing on these bodies of knowledge, the author proposes the existence of an ecosystem that surrounds projects, explains how the project and its ecosystem are distinct but co-dependent entities, and shows why both need to be managed using very different competencies.
