**Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills** Yu, Liguang, 2014-03-31 Computer science graduates often find software engineering knowledge and skills are more in demand after they join the industry. However, given the lecture-based curriculum present in academia, it is not an easy undertaking to deliver industry standard knowledge and skills in a software engineering classroom. As such, lectures hardly engage or convince students. *Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills* combines recent advances and best practices to improve the curriculum of software engineering education. This book is an essential reference source for researchers and educators seeking to bridge the gap between industry expectations and what academia can provide in software engineering education.

*Learning and Mobilising for Community Development* Dr Lynda Shevellar, Dr Peter Westoby, 2012-11-01 *Learning and Mobilising for Community Development* introduces the reader to different ways of thinking about and organising community-based education and training within different settings. Stories from the global south and north illustrate approaches to collective learning and collective action. The book provides not only an insight into the how-to of community-based education and training but, through a range of applications, demonstrates the often unspoken shadow side of the developmental work we undertake. The first section of the book outlines the key elements that underpin effective community-based education and training. It then locates community-based education and training within a broader pedagogical project by tracing the tradition of transformative learning and education. The second half of the book focuses on stories and practice, distilling the application of theory and frameworks. The practitioners within this book emerge from unique and challenging contexts. From civil resistance in West Papua and youth empowerment in South Africa to financial freedom in Australia, these diverse experiences speak to a common quest for social change and justice.

*Anthropology and Development* Jean-Pierre Oliver De-Sardan, 2013-07-18 This book re-establishes the relevance of mainstream anthropological and sociological approaches to development processes and simultaneously recognizes that contemporary development ought to be anthropology's principal area of study. Professor de Sardan argues for a socio-anthropology of change and development that is a deeply empirical, multidimensional, diachronic study of social groups and their interactions. The Introduction provides a thought-provoking examination of the principal new approaches that have emerged in the discipline during the 1990s. Part I then makes clear the complexity of social change and development and the ways in which socio-anthropology can measure up to the challenge of this complexity. Part II looks more closely at some of the leading variables involved in the development process, including relations of production, the logics of social action, the nature of knowledge forms of mediation and political strategies.
