Technical Progress And Soviet Economic Development :

Technical Progress and Soviet Economic Development Ronald Amann, Julian Cooper, 1986-01-01 *Western Technology and Soviet Economic Development 1917 to 1930* Antony C. Sutton, 1968 THIS is the first volume time period 1917 1930 of an empirical study of the relationship between Western technology entrepreneurship and the economic growth of the Soviet Union By far the most significant factor in the development of the Soviet economy has been its absorption of Western technology and skills The continuing transfer of skills and technology to the Soviet Union through the medium of foreign firms and engineers in the period 1917 to 1930 can only be characterized as extraordinary **The Economics of Technological Progress** Tonu Puu, Soren Wibe, 1980-12-11 **Technical Progress and Industrial Growth in the USSR and Eastern Europe** Erkin Bairam, 1988 **Modernisation in Russia since 1900** Markku Kangaspuro, Jeremy Smith, 2006-12-27 Modernisation has been a constant theme in Russian history at least since Peter the Great launched a series of initiatives aimed at closing the economic technical and cultural gap between Russia and the more advanced countries of Europe All of the leaders of the Soviet Union and post Soviet Russia have been intensely aware of this gap and have pursued a number of strategies some more successful than others in order to modernise the country But it would be wrong to view modernisation as a unilinear process which was the exclusive preserve of the state Modernisation has had profound effects on Russian society and the attitudes of different social groups have been crucial to the success and failure of modernisation This volume examines the broad theme of modernisation in late imperial Soviet and post Soviet Russia both through general overviews of particular topics and specific case studies of modernisation projects and their impact Modernisation is seen not just as an economic policy but as a cultural and social phenomenon reflected through such diverse themes as ideology welfare education gender relations transport political reform and the Internet The result is the most up to date and comprehensive survey of modernisation in Russia available which highlights both one of the perennial problems and the challenges and prospects for contemporary Russia Western Technology and Soviet Economic Development: 1917-1930 Antony C. Sutton, 1968 Study of the role of USA in stimulating technological change in the USSR during the period from 1917 to 1930 comprises historical background in support of the contention that western technology played a crucial role in early economic development of the ussr and covers forms of technical cooperation rendered by the USA which favoured industrial development and led to increased productivity in agriculture and in various branches of industry in the country 4 page bibliography and references *Comecon* J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people s democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism It was often compared

with the West European Common Market but differed vastly in its aims structure powers and activities Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise Chapters cover Comecon s history structure and law socialist economic integration the organization s arrangements for international trade and finance environment natural resources and energy labor industry and agriculture science and technology Comecon like the rest of the Soviet Bloc collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come An understanding of its institutions mechanisms and policies remains vital hi appreciating the economic organization of the former Soviet empire This bibliography will therefore be indispensable to policymakers economists historians and political scientists

Institutional Change in Transition Economies Michael Cuddy,2019-01-15 This title was first published in 2002 The importance of institutions for transition economies has so far been overlooked Michael Cuddy and Ruvin Gekker bring together leading experts in the field to fill this crucial void in the literature The contributors concentrate on an ongoing tension between informal constraints and mechanisms and the new formal rules and mechanisms that have gradually evolved through the transition period Experiences are primarily drawn from Russia The book consists of three parts the first comprising an analysis synthesis and generalizations of the institutional adaptations as a market economy slowly emerges from a fog of shifting rules and varying interpretations This is followed by the study of business and taxation authorities behavior as they try to minimize or maximize the taxation take The volume also analyzes the challenges facing central and regional governments in delivering equitable levels of public services across regions of vastly different development levels while at the same time trying to stimulate regional economic growth

Science Policy in the Soviet Union Stephen Fortescue,2024-11-26 Science Policy in the Soviet Union 1990 examines the major institutional and behavioural aspects influencing scientific research in the USSR The book adopts the widespread view that Soviet science performs well below capacity and then looks at the institutions and management in the light of this assumption Low morale and a lack of moral responsibility within the scientific community are highlighted as factors in the poor performance of Soviet science these being compounded by the problems of centralization and the lack of responsiveness to new demands technologies and ideas The author sees de centralisation as a potential solution concluding with a commentary on Gorbachev the obstacles he faced and his awareness of the need for change in the scientific sphere

The World Economy Brian Joseph McCormick,1988

Knowledge Regulation and National Security in Postwar America Mario Daniels,John Krige,2022-04-25 The first historical study of export control regulations as a tool for the sharing and withholding of knowledge In this groundbreaking book Mario Daniels and John Krige set out to show the enormous political relevance that export control regulations have had for American debates about national security foreign policy and trade policy since 1945 Indeed they argue that from the

1940s to today the issue of how to control the transnational movement of information has been central to the thinking and actions of the guardians of the American national security state. The expansion of control over knowledge and know how is apparent from the increasingly systematic inclusion of universities and research institutions into a system that in the 1950s and 1960s mainly targeted business activities. As this book vividly reveals, classification was not the only and not even the most important regulatory instrument that came into being in the postwar era. Trade and Technology in Soviet-Western Relations Philip Hanson, 1981-07-30

Soviet Science on the Edge of Reform Harley D. Balzer, 2019-06-04 It is my sincere hope that the reforms currently being introduced in the USSR will render much of this book obsolete. Yet even if perestroika brings significant change to the Soviet Union, historians will want a record of what existed before. After four years it has become apparent that perestroika is a painful long term process. In such a large and diverse country even the reforms that are successful cannot take place everywhere at once. One major goal in publishing this book is to make data from a major interview project on Soviet science and technology available to a broader audience. Despite the changes taking place, many of the features illuminated by these unique data persist. **Industries and Markets in Central and Eastern Europe** William T. Bagatelas, 2017-11-30 A combination of rigorous analysis and case material, this book is an essential guide to trade and industry developments in Central and Eastern Europe. Its scope encompasses globalization, the business strategies of MNCs, agriculture services, and the dynamics of innovation. It also considers the trading relationships of these countries with Russia, as well as the influence of trade on the democratization of states formerly belonging to the USSR. Planning in Cold War Europe Michel Christian, Sandrine Kott, Ondrej Matejka, 2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes, will of control. However, the persuasion that social and economic processes could and should be regulated was by no means limited to them. Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis. During the Cold War, such discussions fuelled competition between two models of economic and social organisation, but they also revealed the convergences and complementarities between them. This ambiguity, so often overlooked in histories of the Cold War, represents the central issue of the book, organized around three axes. First, it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations. The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World. Finally, it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries. The volume thus contributes to two fields undergoing a process of profound reassessment: the history of modernisation and of the Cold War. *Reassessing Cold War Europe* Sari Autio-Saraso, Katalin Miklóssy, 2010-10-18 This book presents a comprehensive reassessment of Europe in the Cold War period 1945-91. Contrary to popular belief, it shows that relations between East and West were based not only on confrontation and mutual distrust but also on collaboration. The authors

reveal that despite opposing ideologies there was in fact considerable interaction and exchange between different Eastern and Western actors such states enterprises associations organisations and individuals irrespective of the Iron Curtain This book challenges both the traditional understanding of the East West juxtaposition and the relevancy of the Iron Curtain Covering the full period and taking into account a range of spheres including trade scientific technical co operation and cultural and social exchanges it reveals how smaller countries and smaller actors in Europe were able to forge and implement their agendas within their own blocs The books suggests that given these lower level actors engaged in mutually beneficial cooperation often running counter to the ambitions of the bloc leaders the rules of Cold War interaction were not in fact exclusively dictated by the superpowers

Soviet Foreign Policy Carl G. Jacobsen, 2016-01-19 This book looks at the new themes and directions that have characterised Soviet foreign policy during the first Gorbachev era Various aspects are studied in detail such as the shift of attention away from relations with America as being their prime foreign policy concern

Entrepreneurship and Knowledge Exchange Jay Mitra, John Edmondson, 2015-04-17 Over the last several decades there has been a growing interest in the relationship between entrepreneurship and university industry collaboration namely how such cooperation can benefit entrepreneurship development at individual national and regional levels While there are several refereed journal articles on different aspects of university industry cooperation most studies dwell primarily on instruments such as spin offs incubators and graduate entrepreneurs This collection offers the first book length compendium of international comparative perspectives on university industry cooperation Entrepreneurship and Knowledge Exchange explores insights from a wide variety of countries of relevance to researchers as well as policy and decision makers especially those working in developing economies Seminal contributions from top academics in the field such as Alan Gibb Peter Scott and Mary Walshok are included The issues of knowledge transfer entrepreneurship and regional national economic regeneration have inspired countless programs and initiatives at national and regional levels and the chapters in this book examine these initiatives providing both a reference work and a record of practical experience

Soviet Economic Prospects for the Seventies , 1973 Reviewing the Cold War Odd Arne Westad, 2013-10-14 Since the cold war ended it has become an international field of study with new material from China the former Soviet Union and Europe This volume takes stock of where these new materials have taken us in our understanding of what the cold war was about and how we should study it
