

that was reinforced by the Keynesian view that low interest rates stimulated investment. Today, thanks to progressive income tax, there is always enough money in the kitty to pay high interest and debt charges, provided that the States—and now the local authorities—can prise it from the Commonwealth. The conventional wisdom also required a *stable* bond rate to protect savers or their pension funds from capital losses and to maintain their confidence. Even when the bond rate was permitted to rise in the 1950s it was only by broad steps, the rate being kept stable for several years after each increase. Thereafter the economic policy-makers succumbed to the sophistication of fluctuating interest rates, presumably confident that any losses suffered by savers could be ignored in a casino-type world, or alternatively could be readily offset by more social handouts, also financed from the progressive income tax. And so the inflation continues to feed upon itself, and scope for the economic rationality that the Loan Council was originally intended to serve becomes narrower and narrower.

Gilbert's research monograph is a useful supplement to his book and it remedies two deficiencies referred to above. In the first place the Annotation provides an exhaustive examination of the text of the Financial Agreement; but how much more convenient it would have been to have had at least the text of the Agreement included as an appendix to the book! Secondly, in some brief introductory chapters the story is carried beyond the year 1966 at which date the previous narrative stopped. Reference is now made to the subsequent growth of interest-free capital grants and advances to the States, without drawing the obvious conclusion that public borrowing through the Loan Council has thereby been greatly reduced in relative importance. The discussion of the future of the Loan Council does not seem to add materially to that previously included in the book.

Technical Change in Asian Agriculture. Edited by R. T. Shand. (Australian National University Press, Canberra, 1973.) Price not stated.

The popular (and not so popular) press in recent years has led many of us to believe that the 'green revolution' in Asia has or will soon overcome shortages of foodgrain in relation to population and may provide an impetus to the general development of Asian economies. Many of us hope that this will be so. However, it would be foolish to ignore the difficulties and costs which may arise from the development and introduction of new high-yielding foodgrains. Shand and his contributors systematically evaluate the progress which the 'green revolution' has made in Asia and the pitfalls which have been encountered in a number of countries. Quite a number of important policy conclusions can be derived from the book. The volume provides badly needed first-hand data of results and effects which have stemmed from the new

Changing Contours of Asian Agriculture V. S. Vyas, 2009 Commemorative volume published on the 75th birth anniversary of V S Vyas economist from Rajasthan India most of the papers presented at a seminar held at Jaipur in February 2008 *Conceptualizing Technological Change* Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very little about technology and how it develops and changes both spatially and temporally In this original and thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer *Technical Change in Asian Agriculture* Richard Tregurtha Shand, 1973 Historical precedents Current performance Broader implications

Agricultural Transition in China Jun Du, 2018-05-07 This book extends current research on the political economy of modern China with particular regard to agricultural development and its role in economic transition It uses Neoclassical principles to re interpret agricultural growth and technological change under complex market institutions with empirical studies on China and selected East Asian economies The text also questions how technological advances in China contribute to the Great Divergence debate Through a comparative analysis of agricultural technical changes in the planting of rice paddies in Japan Taiwan and China Du finds that different market institutions and structures have given rise to considerable diversity of agricultural change between different economies in terms of the nature timing and duration of technological transition Such diversification has in turn affected the trajectories of agricultural and wider economic growth Here Du reflects on the nature of contemporary Chinese economic development and extends observations on agricultural transition to the entirety of Asia finding that the nature timing and time span of agriculture technology transitions have varied considerably across different economies *Readings in Asian Farm Management* Bock Thiam Tan, Shao-er Ong, 1979

Africa and Asia in Comparative Economic Perspective P. Lawrence, C. Thirtle, 2001-05-14 This invaluable collection compares the relatively unsuccessful economic development of Sub-Saharan Africa with that of the successful Asian economies especially the Asian tigers It covers three main areas of comparison the lessons for Africa from the Asian experience secondly the comparisons of various aspects of economic development in Africa and Asia and finally convergence how far the laggard economies are catching up with or diverging away from each other *Transformation and sources of growth in Southeast Asian agriculture* Birthal, Pratap S., Joshi, Pramod Kumar, Roy, Devesh, Pandey, Ghanshyam, Over the

past few decades the agricultural sector of Southeast Asia has experienced robust growth and undergone a structural transformation albeit differentially across the countries in the region The main aims of this paper are to understand the process of transformation and sources of growth in agriculture in the broader context of economy wide changes in domestic and international markets and to suggest technological institutional and policy measures for faster efficient and sustainable growth Our findings show faster growth in agriculture in comparatively low income countries with technological change area expansion and diversification being the main drivers On the other hand agricultural growth in high income countries has been relatively slow and driven by price increases mainly of the export oriented commercial crops such as oil palm rubber and coconut and also by area expansion In view of the fixed supply of land and high volatility in global food prices area and price driven growth is unlikely to sustain in the long run For efficient sustainable and inclusive growth the recourse has to be with exploiting potential of i existing and frontier technologies by investing more in agricultural research and extension systems and ii diversification of production portfolio towards higher value food commodities by strengthening institutions that link farmers to remunerative markets and investing in post harvest infrastructure for food processing
