Monthly Bulletin, 1879      *Ancient Near Eastern Iconography and the Bible* Hans Ulrich Steymans, 2024-10-31 Examines the dilemma of whether ancient Near Eastern images while providing unique aspects of the world views of the cultures from which the Bible arose can be interpreted in a way that traceably relates them to the biblical text To avoid the danger of using images merely as illustrations for concepts found in the Bible one first needs to behold the image with its own right to be seen The essays within this volume describe the methods developed by Othmar Keel for bringing imagery into a dialogue with texts from the ancient Orient and their own interpretation including previously unpublished material from Keel The contributions begin with an overview of the scholarly work of Keel and the development of his aims and methods including a revision of an article dealing with semiology in the interpretation of art The book proceeds to address the research history of iconology in art history presenting the methodology of Erwin Panofsky and one of his influential predecessors Charles Clermont Ganneau in contrast with Keel's three methodological steps leading from iconographic analysis to iconology Contributors then present two case studies of how Keel's method can be applied to interpret Egyptian and Mesopotamian images allowing insights into the worldview of an ancient culture and the aim of iconology The book concludes with a report about how iconographic analysis and iconology is taught on University level      **Vittorio Benussi in the History of**

**Psychology** Mauro Antonelli, 2019-01-04 This book covers the basic guidelines of Vittorio Benussi's research during the period at Graz and at Padua It does so in the light of a thorough study of his Nachlass The book re-evaluates Benussi's work as a historical piece and shows how his work is still relevant today especially in the areas of cognitive psychology and cognitive science The volume deals with this original and ingenious though largely ignored scholar and discusses his work as a leading experimental psychologist Benussi's contributions as discussed in this book were particularly relevant in the fields of visual and tactile perception time perception forensic psychology hypnosis and suggestion unconscious and emotions His classical papers are impressive in their originality energy range of approaches experimental skill the wealth of findings and the quality of theoretical discussions This book demonstrates that Benussi was ahead of his time and that his themes experiments and research programmes are highly relevant to contemporary cognitive psychology      **A View of Berg's Lulu**

Patricia Hall, 2023-11-15 After 50 years of analysis we are only beginning to understand the quality and complexity of Alban Berg's most important twelve tone work the opera Lulu Patricia Hall's new book represents a primary contribution to that understanding the first detailed analysis of the sketches for the opera as well as other related autograph material and previously inaccessible correspondence to Berg In 1959 Berg's widow deposited the first of Berg's autograph manuscripts in the Austrian National Library The complete collection of autographs for Lulu was made accessible to scholars in 1981 and a promising new phase in Lulu scholarship unfolded Hall begins her study by examining the format and chronology of the

sketches and she demonstrates their unique potential to clarify aspects of Berg's compositional language. In each chapter Hall uses Berg's sketches to resolve a significant problem or controversy that has emerged in the study of Lulu. For example, Hall discusses the dramatic symbolism behind Berg's use of multiple roles and how these roles contribute to the large-scale structure of the opera. She also revises the commonly held view that Berg frequently invoked a free twelve-tone style. Hall's innovative work suggests important techniques for understanding not only the sketches and manuscripts of Berg but also those of other twentieth-century composers. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1996.

**Existentialism and Education** Ralf Koerrenz, 2017-03-09 This volume examines Otto Friedrich Bollnow's philosophical approach to education, which brought Heidegger's existentialism together with other theories of what it is to be human. This introduction to Bollnow's work begins with a summary of the theoretical influences that Bollnow synthesized and goes on to outline his highly original account of experiential educational reality, namely as a reality alternately harmonious or broken but fundamentally guided. This book will be of value to scholars and students of education and philosophy, especially those interested in bringing larger existential questions into connection with everyday educational engagement.
