The Bilingual Mental Lexicon Longxing Wei, 2019-11-13 This book proposes the Bilingual Lemma Activation Model as a method for exploring the nature and activity of the bilingual mental lexicon in both speech production and language acquisition This model claims that the bilingual s two languages are not equally activated in code switching one playing a crucial role in grammatical frame building and the other being activated at a lexical level due to psycholinguistic reasons To test this model the book analyzes bilingual speech data from naturally occurring intrasentential code switching instances involving various language pairs A second claim of this model is that code switching naturally occurs because certain lemmas underlying some particular lexical

items stored in the bilingual mental lexicon are language specific and such lemmas are in contact in bilingual speech To further test this model second language acquisition data are analyzed here to describe and explain sources of language transfer at the level of abstract lexical structure Thus from some psycholinguistic perspectives this model views bilingual speech involving code switching and interlanguage performance data as predictable outcomes of bilingual systems in contact This book will appeal to graduate students and researchers in both theoretical and applied linguistics **Spaces, Worlds, and Grammar** Gilles Fauconnier, Eve Sweetser, 1996-12 In the highly influential mental spaces framework developed by Gilles Fauconnier in the mid 1980s the mind creates multiple cognitive spaces to mediate its understanding of relations and activities in the world and to engage in creative thought These twelve original papers extend the mental spaces framework and demonstrate its utility in solving deep problems in linguistics and discourse theory Investigating the ties between mental constructs they analyze a wide range of phenomena including analogical counterfactuals the metaphor system for conceptualizing the self abstract change expressions in Japanese mood in Spanish deictic expressions copular sentences in Japanese conditional constructions and reference in American Sign Language The ground breaking research presented in this volume will be of interest to linguists and cognitive scientists The contributors are Claudia Brugman Gilles Fauconnier George Lakoff Yo Matsumoto Errapel Mejias Bikandi Laura A Michaelis Gisela Redeker Jo Rubba Shigeru Sakahara Jose Sanders Eve Sweetser and Karen van Hoek **Attention and Awareness in Foreign Language Learning** Richard W. Schmidt, 1995 Presents research into the learning of Spanish Japanese Finnish Hawaiian and English as a second language with additional comments and examples from French German and miniature artificial languages *The Routledge Handbook of Second Language Acquisition and Input Processing* Wynne Wong, Joe Barcroft, 2024-06-27 This state of the science handbook offers a comprehensive discussion of input processing in second language acquisition The volume assesses past and current research on input processing and engages the reader in critical reflection about the current state of the field and what lies ahead for future research theory building and implications for language instruction The handbook considers multiple theoretical perspectives pivotal research findings issues in research methodology and instructional implications that underscore the centrality of input processing in second language acquisition Whereas to date most research in this area has focused on input processing as it relates to the acquisition of morphosyntax and lexis the present volume also attends to more recent theoretical advances regarding other linguistic subsystems such as phonology and pragmatics as well as processing resource allocation during multilevel input processing Thorough and forward looking this volume is an indispensable resource to scholars and advanced students of second language acquisition bilingualism applied linguistics cognitive science psychology and education *Approaches and Methods in Language Teaching* Jack C. Richards, Theodore S. Rodgers, 2014-04-16 In addition this third edition includes content on the teaching and learning environment with chapters on learners and methods teachers and methods plus approaches methods and the curriculum **Historical Semantics and**
