Studies on Medieval and Early Modern Women 4, 2005 **Studies on Medieval and Early Modern Women 4**, 2005

Victims Or Viragos? Christine Meek, Catherine Lawless, 2005 The fourth volume in the series *Fragility of her sex* 1997

Women in renaissance and early modern Europe 2000 Studies in medieval and early modern women pawns or players 2003 by established and younger scholars covers a wide time span and geographical area ranging from examinations of individual women in their medieval context to those involved in revolutionary Europe **The Power of a Woman's Voice in**

Medieval and Early Modern Literatures Albrecht Classen, 2012-02-13 The study takes the received view among scholars that women in the Middle Ages were faced with sustained misogyny and that their voices were seldom heard in public and subjects it to a critical analysis The ten chapters deal with various aspects of the question and the voices of a variety of authors both female and male are heard The study opens with an enquiry into violence against women including in texts by male writers Hartmann von Aue Gottfried von Stra burg Wolfram von Eschenbach which indeed describe instances of violence but adopt an extremely critical stance towards them It then proceeds to show how women were able to develop an independent identity in various genres and could present themselves as authorities in the public eye Mystic texts by Hildegard of Bingen Marie de France and Margery Kempe the medieval conduct poem known as *Die Winsbeckin* the Devout Books of Sisters composed in convents in South West Germany but also quasi historical documents such as the memoirs of Helene Kottaner or Anna Weckerin s cookery book demonstrate that far more women were in the public gaze than had hitherto been assumed and that they possessed the self confidence to establish their positions with their intellectual and their literary achievements **The Image and Perception of Monarchy in Medieval and Early Modern Europe** Sean

McGlynn, Elena Woodacre, 2014-10-02 Monarchy is an enduring institution that still makes headlines today It has always been preoccupied with image and perception never more so than in the period covered by this volume The collection of papers gathered here from international scholars demonstrates that monarchical image and perception went far beyond cultural symbolic and courtly display although these remain important and were in fact always deeply concerned with the practical expression of authority politics and power This collection is unique in that it covers the subject from two innovative angles it not only addresses both kings and queens together but also both the medieval and early modern periods Consequently this allows significant comparisons to be made between male and female monarchy as well as between eras Such an approach reveals that continuity was arguably more important than change over a span of some five centuries In removing the traditional gender and chronological barriers that tend to lead to four separate areas of studies for kings and queens in medieval and early modern history the papers here are free to encompass male and female royal rulers ranging across Europe from the early thirteenth to the late seventeenth centuries to examine the image and perception of monarchy in England Scotland France Burgundy Spain and the Holy Roman Empire Collectively this volume will be of interest to all those

studying medieval and early modern monarchy and for those wishing to learn about the connections and differences between the two The Ashgate Research Companion to Women and Gender in Early Modern Europe Jane Couchman,2016-03-23

Modern Low Countries, 1500 - 1750 Sarah Joan Moran,Amanda C. Pipkin,2019-05-07 Women and Gender in the Early Modern Low Countries 1500 1750 brings together research on women and gender across the Low Countries a culturally contiguous region that was split by the Eighty Years War into the Protestant Dutch Republic in the North and the Spanish controlled Catholic Hapsburg Netherlands in the South The authors of this interdisciplinary volume highlight women s experiences of social class as family members before the law and as authors artists and patrons as well as the workings of gender in art and literature In studies ranging from microhistories to surveys the book reveals the Low Countries as a remarkable historical laboratory for its topic and points to the opportunities the region holds for future scholarly investigations Contributors Martine van Elk Martha Howell Martha Moffitt Peacock Sarah Joan Moran Amanda Pipkin Katlijne Van der Stighelen Margit Th fner and Diane Wolfthal **Heroines, Harpies, and Housewives** Martha Moffitt

Peacock, 2020-11-16 Co Honorable Mention for the 2021 Book Award by the Society for the Study of Early Modern Women and Gender SSEMWG In *Heroines Harpies and Housewives* Martha Moffitt Peacock provides a novel interpretive approach to the artistic practice of Imaging Women of Consequence in the Dutch Golden Age From the beginnings of the new Republic visual celebrations of famous heroines who crossed gender boundaries by fighting in the Revolt against Spain or by distinguishing themselves in arts and letters became an essential and significant cultural tradition that reverberated throughout the long seventeenth century This collective memory of consequential heroines who equaled or outshone men is frequently reflected in empowering representations of other female archetypes authoritative harpies and noble housewives Such enabling imagery helped in the structuring of gender norms that positively advanced a powerful female identity in Dutch society

Women's Roles in the Middle Ages Sandy Bardsley, 2007-06-30 Information about women in this truly fascinating period from 500 to 1500 is in great demand and has been a challenge for historians to uncover Bardsley has mined a wide range of primary sources from noblewomen's writing court rolls chivalric literature laws and legal documents to archeology and artwork This fresh survey provides readers with an excellent understanding of how women high and low fared in terms of religion work family law culture and politics and public life Even though medieval women were divided by social class religion age marital status place and period they were all subject to an overarching patriarchal structure and sometimes could transcend their inferior status Numerous examples of these exceptional women and their words are included Chapter 1 examines religion focusing on women's roles in the early Christian church the lives of nuns and other professional religious women such as anchoresses and Beguines the participation of Christian laywomen and the experiences of Jewish and Islamic women in Western Europe The second chapter examines women's work looking in turn at the kinds of work performed by peasant women townswomen and noblewomen Women's roles within the family form the subject of the third chapter This chapter follows women throughout the typical lifecycle from girl to widow examining the expectations and experiences of women at each stage Chapter 4 Women and the Law focuses on the ways in which laws both restricted and protected women It also considers the crimes with which women were most often charged and surveys laws regarding marriage and widowhood Women's roles in creative arts form the basis of the fifth chapter Women and Culture This chapter examines women's roles as artists authors composers and patrons as well as investigating the ways in which women were represented in works produced by men Finally chapter 6 discusses women's experiences in politics and public life While women as a group were typically banned from holding positions of public authority some found ways to get around this stricture while others were able to exercise power behind the scenes The final chapter thus encapsulates a major theme of this book the interplay between broader patriarchal forces that limited women's status and autonomy and the role of individuals who were able to overcome or circumvent such forces Medieval women were as a group subordinate to their husbands and fathers but certain women under certain circumstances evaded subordination
