

Critical Thinking Reflection Paper

2 pages | 265 words

Critical thinking is a skill that allows you to analyze and evaluate information. It's important for things like problem-solving, decision-making, and evaluating claims.

The question that I selected is "Will receiving a college degree improve your career opportunities?" The obvious answer to this question is yes. However, I want to be sure of my answer by backing it up with critical thinking skills to determine that I have come up with the correct answer. One step to critical thinking is making sure that one's answer can be well supported by factual information. A fallacy is an argument that is based on a weak argument with little to no supportive factual information. To make sure that my answer to the above question is a valid argument, I would need to conduct research and list all of the information that I find. I may look into statistical information such as the employment rate of those with college degrees as compared to those without a college degree in a particular career field.

Another aspect of critical thinking is checking one's answers and determining that they are well supported and well researched ideas. It is important to question one's own ideas and looking at them from a skeptical point of view to find any weaknesses in the argument. This process can be applied to any area of life where a decision must be made. To ensure that I continue to use critical thinking skills throughout my life I can practice using critical thinking for simple situations, therefore making critical thinking a habit rather than a forced thought.
