An Outline of Esoteric Science Rudolf Steiner, 1997 As vital and relevant as when it was first published in 1910 this masterpiece of esoteric Rosicrucian cosmology on which Rudolf Steiner worked and then reworked for many years making it ever more precise and accurate remains the most effective presentation to date of the spiritual alternative to contemporary materialist cosmologies and the Darwinian view of human nature and evolution In this basic work of spiritual science readers learn how the creation and evolution of humanity is embedded at the heart of the vast invisible web of interacting cosmic beings through whom the alchemical processes of cosmic evolution unfold There are also descriptions of the different bodies of the human being and their relation to sleep and death as well as a detailed practical guide to the methods or exercises including the Rose Cross Meditation by which such initiation knowledge can be attained Most remarkable and revolutionary of all perhaps is the central function that Rudolf Steiner allots to the Christ and to the entrance of Christ into early evolution through the Mystery of Golgotha back

cover *Jesus, Lazarus, and the Messiah* Charles Tidball, 2005-05 This remarkable short guide to meditation is the fruit of many years of meditative experience as well as thirty years of teaching meditation Through exercises and meditation sentences it delineates an accessible systematic process of inner work by which a person can come to experience both the I or Self and the miraculous nature of that Light that as inner Light we call attention Beginning with simple meditation sentences that illuminate the role of attention in perception the person wishing to take this path is led gradually to the reality and experience of form free attention K hlewind offers step by step guidance in concentration exercises sentence meditations visualizations image or symbol meditations and perceptual meditations for guidance on the path He also offers advice and help with the difficulties and problems that can arise Each stage of the path in itself and in relation to the whole sequence is presented in a way to be understood through meditative thinking Deepened in this way it becomes as well a work of philosophy but philosophy understood as a transformative way of life an inner path *The Redemption of the Animals* Douglas Sloan, 2015-10-15 As human beings what is our true relationship to the animals on earth What is our responsibility to our fellow creatures Douglas Sloan explores these and other questions in this important book on the human animal connection His explorations are based on personal experience and wide ranging research into the work of Rudolf Steiner and others including scientist students of the inner life of animals and committed defenders of animal wellbeing Rudolf Steiner describes how from the beginning of creation humans and animals have been united in deep kinship A loss of the sense of this human animal connection has resulted in an immense animal suffering the world over Especially in their suffering the animals now pose for the modern human being many pressing and perplexing questions Are the animals conscious Do they have feelings like ours Do they experience pain Do the animals have a spiritual reality and experience Do the animals have souls and selves Do the animals have capacities for cognitive intelligence emotional empathy language and memory Is there a crucial difference between the human and the animal a basic difference in kind or only a difference in degree Do animals have rights Are we justified in using the animals as we wish eating them hunting them experimenting on them Rudolf Steiner presents a vision of the ultimate redemption of the animals from their suffering What is the nature of this redemption What is our responsibility in making it happen In exploring these and related questions with the help of Rudolf Steiner s work and that of others on the issue we can begin to see the importance in our time of our relating to the animals in a completely new way a relationship that understands and respects the animals inner spiritual being and one that requires a deep grasp of our own spiritual being in relation to theirs In this book Douglas Sloan seeks to help us toward this new relationship with the animals both in concept and in everyday action *The Routledge Research Companion to Nineteenth-Century British Literature and Science* John Holmes, Sharon Ruston, 2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date foundation for research in this field In intellectual material and social terms the

transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman [American Book Publishing Record](#) ,1999 [The Ashgate Research Companion to Nineteenth-Century Spiritualism and the Occult](#) Tatiana Kontou,2016-03-23 Critical attention to the Victorian supernatural has flourished over the last twenty five years Whether it is spiritualism or Theosophy mesmerism or the occult the dozens of book length studies and hundreds of articles that have appeared recently reflect the avid scholarly discussion of Victorian mystical practices Designed both for those new to the field and for experts this volume is organized into sections covering the relationship between Victorian spiritualism and science the occult and politics and the culture of mystical practices The Ashgate Research Companion to Nineteenth Century Spiritualism and the Occult brings together some of the most prominent scholars working in the field to introduce current approaches to the study of nineteenth century mysticism and to define new areas for research *The Most Holy Trinosophia and the New Revelation of Divine Feminine* Robert Powell,2000 The rising interest in goddess spirituality expresses our current need to understand the feminine side of God the Sophia or Divine Wisdom and her relationship to the masculine aspects of God Offering a new perspective the author draws on his own research and on the teaching of Russian philosopher Pavel Florensky according to whom Sophia has a relationship to the masculine Trinity as an independent spiritual being Robert Powell discusses Sophia as a Trinity as Mother Daughter and Holy Soul and as the feminine aspect of Divine Godhead He connects our reawakening to the feminine aspect of God with many of the changes now taking place in the world Also included is an introduction to the Divine Feminine by Daniel Andreev author of *The Rose of the World* **A Guide to Child Health** Michaela Glöckler,2013-09-19 This acclaimed guide to children s physical psychological and spiritual development is now available in a fourth revised edition Combining up to date medical advice with issues of development and education this is a definitive guide for parents This is the book for anyone who has ever wanted a deeper understanding of their children s illnesses or sought a more holistic approach to children s health As well as comprehensively covering medical issues it also discusses parenting techniques education spirituality and play a truly integrated approach to all aspects of raising healthy children in the broadest sense The authors have over 20 years experience treating children at Herdecke Hospital Germany which is run using anthroposophical principles The fourth edition includes updates on treatments for tonsillitis croup sunstroke and headlice The section on
