web nov 4 2023 as wind energy continues to be a crucial part of sustainable power generation the need for precise and efficient modeling of wind turbines especially under yawed conditions becomes increasingly significant addressing this the current study introduces a machine learning based symbolic regression approach for elucidating

**data augmented sequential deep learning for wind power forecasting** - Jan 01 2023

web nov 15 2021 this paper initially scrutinizes the usefulness of data augmentation approaches in wind power forecasting and proposes a multi input and multi output prediction algorithm with verified superiority inferences on the results of multistep forecasting five wind turbines with various topologies conclusions are given as follows
