Jeffrey A. Larsen, James M. Smith

Superpowers And Nuclear Arms Control Rhetoric And Reality:

The Superpowers and Nuclear Arms Control Dennis Menos, 1990-04-23 The nuclear arsenals of the United States and the Soviet Union are larger better equipped and deadlier than at any other time in history This incisive book contends that the superpowers while exhibiting enormous ingenuity in the area of arms development have shown only a minimal interest toward the containment of arms This is a carefully documented evaluation of the mismanagement of nuclear arms control by the superpowers and of their failure to contain the nuclear arms race despite their involvement in the process for over a quarter of a century Only the superpowers can reduce the proliferation of nuclear arms and in the process lessen the likelihood of nuclear war through accident miscalculation or crisis escalation Yet forty four years after Hiroshima not a single wanted nuclear weapon has been eliminated by them The Superpowers and Nuclear Arms Control addresses a broad spectrum of nuclear arms control issues beginning with the history of the nuclear arms race the lukewarm attempts by the superpowers at nuclear arms control and the role of the nuclear havenots The book then considers current threats to arms control evidenced by the termination of the SALT regime and plans to discard the ABM Treaty A discussion of the congressional executive split on numerous key arms control issues is followed by conclusions drawn from observing decades of negotiation Comprehensive appendices contain valuable charts and other documents that reinforce the content of the text This resource is a useful tool for arms control and disarmament activists students and researchers and for the many men and women everywhere who are at a loss to understand why so little is being accomplished in this critical area **Historical**

Dictionary of Arms Control and Disarmament Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament provides a historical review of key themes and issues in international security and arms control focusing on efforts in the 20th century to control the spread and use of armaments and to prevent war This book summarizes the rich and proud traditions of arms control and disarmament their critical role in ensuring a non catastrophic course throughout history especially the dangerous period of the Cold War and their continuing relevance and role in the emerging post Cold War world It also seeks to reinforce a broad perspective of key terms in order to capture the scope and range of their application yesterday today and tomorrow Given this combined tradition and focus this Dictionary serves two purposes As a historical dictionary it chronicles key terms personalities events and agreements as a ready reference from which to launch a more extensive investigation But it also seeks to capture the breadth of current and future applications by presenting the vocabulary of traditional and non traditional approaches The book includes a large dictionary of more than 1 000 key terms as well as a comprehensive bibliography divided into multiple categories an extensive chronology and a timeline This book can also serve as a useful desk reference for the policy practitioner The pace and intensity of the practice of arms control often eliminates the luxury of conventional study of past or related arms control efforts The dictionary seeks to provide a relevant sampling of treaty and agreement details and of the specific terms of reference of arms control to allow

productive progress in a policy work environment Researchers and students will also find the dictionary to be a useful reference tool Much of the formal literature in the field such as treaty texts and policy pronouncements is written in technical language without elaboration Also many references to agreements are posed in shorthand intended only for the policy practitioner

Professional Journal of the United States Army ,1991 *Nuclear Disarmament in International Law* Haralambos Athanasopoulos,2000-02-01 When German physicists Otto Hahn and Fritz Strassman first split the uranium atom in 1938 they might have little imagined the potential power their experiments had unleashed Since the United States successfully detonated the first atomic weapons in 1945 the entire world has lived in fear of annihilation Technological advances in weaponry and importantly their delivery systems have only heightened the sense of dread Yet since the end of World War II world governments have been unable to agree on a strategy for nuclear disarmament This led first to the Cold War and ultimately to the proliferation of nuclear weapons throughout the world This work examines the nuclear question within the framework of international law The advent of the nuclear age and its impact on postwar peace and law is first covered This is followed by analyses of the initial United Nations disarmament initiatives and the reasons they were doomed from the start The globalization of the Cold War the expansion of the nuclear arms race and the START treaties and the legacy of 1970s era detente efforts in the years leading up to the end of the Cold War are then detailed How the United Nations reacted to the end of the Cold War and the prospects for disarmament in the 21st century are the subjects of the concluding section
