Fachrichtungen **Counselor Supervision** Nicholas Ladany, Loretta J. Bradley, 2011-01-19 Ladany and Bradley's sophisticated comprehensive compilation of contemporary models of supervision is sure to serve as the new handbook in the field. This exceptional volume will inspire supervisors from all theoretical orientations to do more effective work with their supervisees. Lisa Wallner Samstag, PhD Professor of Psychology Long Island University *Counselor Education and Supervision*, 1998 *A Manual for Evidence-Based CBT Supervision* Derek L. Milne, Robert P. Reiser, 2017-03-14 The effectiveness of CBT depends on the quality of the supervision and training that is provided to its practitioners. A Manual for Evidence Based CBT Supervision is intended to significantly strengthen the available resources for training and supporting CBT supervisors. The authors drew on the insights of many accredited CBT supervisors to develop the guidance and the work is built firmly on an evidence based approach. This manual will also be useful for individual supervisors and to those who support and guide trainers and supervisors e.g. peer groups, consultants, managers, administrators, training directors as the authors include training supervision guidelines and training materials e.g. video clips, guidelines and PowerPoint slides. In summary, this manual provides critical guidance in a number of areas: Training resources and evidence based guidance to individual supervisors in a continuing education professional development workshop format; Criteria and guidance including measurement tools and competence standards to support the certification of supervisors; Assisting in a train the trainers approach suitable for agency or organization based training of supervisors; Coaching and training supervisors and supervisees remotely through supplementary materials and an interactive website. **Research in Counselling and Psychotherapy** Windy Dryden, 1996-03-28 Many counselling and psychotherapy researchers are suspicious of the pronouncements of practitioners because they are not backed up by research. Similarly, practitioners tend to ignore research findings because they consider that they have little relevance to their clinical practice. This book bridges the gap that currently exists between research and practice in counselling and psychotherapy by providing detailed clinical examples of the practical relevance of research. It brings together contributions from leading British and American psychotherapy researchers who describe their research programmes and explore how their findings can substantially inform therapeutic practice. The book calls for the close integration of research and practice. **Supervision Strategies for the First Practicum** Susan Allstetter Neufeldt, 2007
